

FOSDEM 2011: Saturday

	Janson Keynotes	
10:00	Welcome to FOSDEM 2011	← Eben Moglen
10:30	Political liberty and Software Freedom	
11:00		
11:30		
12:00	LLVM and Clang	← Chris Lattner
12:30		

	Ferrer Lightning talks	Lameere Embedded	H.1301 Mozilla	H.1302 Distributions	H.1308		H.1309 XDesktop	H.2213 MySQL	H.2214 GNU
13:00	- Sirius - Magellan	Arduino/ AVR: amforth	Mozilla in 2011			13:00	Opening	MySQL 5.5	Org-mode for Emacs
13:30	- Libre graphics magazine		Firefox 4	COMAR	Good downstream	13:30	KDE education	HandlerSocket	
14:00	- Coreboot - flashrom	XMOS Multicore Embedded Hardware		NixOS for declarative deployment and testing	Swimming upstream	14:00	Community anti-patterns	I/O prefetch for InnoDB	Dynamic Hacking with Guile
14:30	- 0MQ		In-Tab UI			14:30		XtraDB performance show	
15:00	- Neo4j - iRail	Flukso community metering		Amazing openSUSE	Downstream packaging collaboration	15:00	Gallium state trackers	Data recovery	GNU Parallel
15:30	- Seeks		HTML5 is here			15:30	Group Photo	XtraBackup	GNU Autotools
16:00	- Pagekite - Apache Etch - Forban	DaVinci dm365 for home automation		Gentoo's RelEng and catalyst use	HP & comm. Linux distros	16:00	Intro to Qt and QtQuick	MariaDB qry optimizer	GNU Network Security Labyrinth
16:30			SUMO		Model checking the kernel?	16:30	Vala? are you kidding me?	MySQL 5.5 replication	Power, freedom, software
17:00	- Sahi - CyaSSL - Cloud9 IDE	Milymist, electronics openness	Analyzing Crash Data	Gentoo's Reform and future	Comparative analysis of evolving libre software	17:00	E17	Tungsten	Non-free software advertisement
17:30						17:30		Multimaster failover	GNU recutils
18:00	- Aalto-1 - Chicken - Scala	Bootng and upgrading a flashless system		Gentoo Q&A session	Mancoosi tools for analysis and QA of distros	18:00	KDE abstracted my abstraction layer	Multimaster replication	
18:30						18:30		Overview of Maatkit	

	Janson System	Chavanne Web	AW1.105 Security	AW1.117 GNUstep	AW1.120 Mono	AW1.121 Jabber/XMPP	AW1.124 Data analytics	AW1.125 Free Java	AW1.126 BSD	UA2.114 Certification	Guillissen Certification		
13:00				Developer Meeting	F# and MonoDevelop	Power of XMPP	Welcome	13:00	Welcome	ZFS in open source operating systems	LPI Why ?	12:45	
13:30			SC and crypto jungle	Étoilé	Manos	Jabber-RPC	Hadoop Pig	13:30	State of OpenJDK		LPI How ?	13:30	
14:00	DevOps? more than marketing	The life of a Firefox feature	SSH libraries, SSH vs TLS				XMPP and security	Mahout	14:00	IcedRobot	mk-configure	BSD Associate + TYPO3 exam sessions	LPI exam session #1
14:30			libcurl	LanguageKit	Web Objects	XMPP experts Q&A	MongoDB & Gephi	14:30					
15:00	systemd: beyond init	Qt Webkit goes Mobile	Fribid and browser sec	Fast flexible UI development with EtoileUI	Making happy developers	CiviCRM and XMPP	Web data	15:00	Distributions	Bringing OMAP3 into FreeBSD		15:00	
15:30			EJBCA and OpenSC		Mono pkgng in Debian	XMPP conf calls	Datalift	15:30	Packaging nightmare				15:30
16:00	I'm going M.A.D.		PKCS#11 tokens	UIKit/iOS		Yate client	GNU Data Language	16:00	Pkging guide				16:00
16:30			How to store trust	Simple WebKit, QuantumSTEP	Mono C++ Interop		scikits.learn	16:30		Lua meets BSD	LPI exam session #2	16:30	
17:00			SystemTap			XMPP - cloud 2.0	Wikipedia	PyF	17:00	IcedTea-Web project			
17:30			Dynalopin	DBusKit	Mono's new garbage collector	Federated Social Netwkg		17:30	IcedTea JavaWS	BSD-licensed Toolchain Status		17:30	
18:00			OpenSC 2015	Obj-C support in GCC 4.6	Graph DB access layer for .NET/Mono		Lucene and S4	18:00	Open sourcing Java	Introduction to FreeBSD		18:00	
18:30			Open panel discussion	GS/OpenBSD	CloudB		Seeks	18:30	Rise and fall and rise				18:30
				GORM and GS theming			NoSQL databases						

FOSDEM 2011 - Sunday

Janson Languages		Chavanne Web frameworks		Ferrer Lightning talks		Lameere Embedded		H.1301 Mozilla		H.1302 Distributions		H.1308 CrossDesktop		H.1309		H.2213 PgSQL		H.2214 LibreOffice	
09:00				09:00			BareBox: booting Linux fast and fancy		09:00		sssd		09:00				Accessible Authoring		09:00
09:30				09:30				XULRunner applications	09:30	Ada in Debian and other distributions	Improving rollback		09:30				Hacking LibreOffice		09:30
10:00	PL/Parrot	Apache Wicket		10:00	- Mediamosa - Android video stmg - Sinatra		Linaro		10:00		Pardus and pisi		10:00		Async notifications		Marketing to developers		10:00
10:30				10:30				about: volunteers	10:30	The difficulty of forking	Zentyal		10:30	KDE on Windows			Localisation		10:30
11:00	Objective-C	Django's architecture		11:00	- Rails admin - KDevelop - Timebank		Qt tales from the embedded trenches	Messaging/ Thunderbird	11:00	Simple cross- distribution installation framework ?	Debian GNU/ kFreeBSD		11:00	libfolks		PgSQL extension development	Understanding the Writer core		11:00
11:30		Cloud		11:30				Gloda	11:30				11:30				Wikihelp		11:30
12:00	Practical Go programming	Infinispan		12:00			MeeGo		12:00				12:00	Project Bretzn		Writing a user- defined type			12:00
12:30				12:30					12:30	Sharing package descriptions	piuparts. debian.org		12:30				Easy hacks		12:30
13:00				13:00		Keysigning		Firefox startupspeed	13:00	Application Installer	Distributed build of RPMs		13:00	Games with Gluon			Document Foundation		13:00
13:30	Office	Cloud		13:30			OpenBricks, an embedded linux platform	Mozmill Crowd	13:30				13:30				Design team		13:30
14:00	Liberating Open Office development	Facebook Messages		14:00	- Agora voting - Village-telco - XWiki		Cold boot attacks		14:00	Collaboration Manifesto	Configuration data upgrade		14:00	Grilo		pgpool-II version 3	Impress hacking		14:00
14:30				14:30			Really fast x86 boot	Lightning Talks	14:30	Debian			14:30	Next desktop is the browser					14:30
15:00	WebODF	Disaster recovery with rear		15:00	- Mongrel2 - PubSub- Hubbub - UC Engine		Enlightenment Foundation Libraries	WoMoz	15:00	ZYpp	Make QA engineers start drooling		15:00			PostgreSQL Extension Network	Helping out in the Calc core		15:00
15:30				15:30					15:30	Gumby			15:30	Let me teach you how to fish			Writing import filters		15:30
16:00	Calligra under the hood	Massively scalable cloud		16:00	- EducOOo - FreeMedForms - Thousand Parsec		Creating secure web UIs for embedded		16:00	APT-PBO	One source		16:00	Introduction to WebKit		MVCC for clustered databases	A new build system		16:00
16:30				16:30					16:30		Flexible worker pool		16:30	Closing			The difficulty of forking		16:30
17:00	Closing			17:00					17:00				17:00						17:00
17:30	How kernel development goes wrong	← Jonathan Corbet		17:30					17:30				17:30						17:30
18:00	EOF			18:00					18:00				18:00						18:00

FOSDEM venue:
ULB Campus Solbosch
Avenue Franklin D. Roosevelt 50
1050 Brussels, Belgium

FOSDEM 2011 - Sunday

	AW1.105 Virtualization	AW1.120 C&SM	AW1.121 A11y		AW1.124 OS Telephony	AW1.125 Free Java		AW1.126 Perl	Guillissen LPI	
09:00	Welcome	A tale of disaster recovery	How does a blind person see ... ?	09:00	Welcome		09:00	Using Perl6 today		09:00
09:30	Intro			09:30	Asterisk Development Intro	Jigsaw	09:30	Curses::Toolkit		09:30
10:00	VPNs in EC2	Abstraction, Formalization, Standardization	A11y in WebKitGTK+	10:00	Digital PSTN with Askterisk	Modular Java	10:00	Perl data structures		10:00
10:30	P2P VPN			10:30		Project Coin		10:30		
11:00	Marionnet	Application deployment with Chef	A11y in OCRFeeder	11:00	Mobicents 2.0		11:00	Tracing Perl	LPI exam session #3	11:00
11:30	FairVPN			11:30				11:30		Template::Zoom
12:00	Virtualbricks	Config mgmt for development environments	GNOME 3.0 accessible	12:00	Kamailio	Hotspot and SystemTap	12:00	Moose		12:00
12:30	VDE 3			12:30		Unifying SIP and web with Lua	JamVM	12:30		
13:00	Brainstorming	Gepetto	Orca	13:00	XiVO IPPBX OpenHardware		13:00		LPI exam session #4	13:00
13:30				13:30		SIP communicator	Azul into open source	13:30		Padre Perl IDE
14:00	Ganeti 2.4	Foreman	Opengazer, dasher and ticker	14:00		Free Java	14:00	Packaging Perl		14:00
14:30	SPICE			14:30		Askterisk SCF Dev interfaces	PHP reboot	14:30	Processing XML	
15:00	USB redirection	Config mgmt for developers	odt2daisy and odt2braille	15:00			15:00		LPI exam session #5	15:00
15:30	View-OS			15:30		Rich VoIP: SIPSIMPLE SDK	Rhino and RingoJS	15:30		Dancer
16:00	Brainstorming	Fusion-Inventory and GLPI		16:00	Yate and YateClient	AltosUI	16:00	SPORE		16:00
16:30				16:30		Closing	Gervill low latency	16:30	Code, release, market	
17:00	Wrap-up	MS Windows management with OPSI		17:00			17:00			17:00
17:30				17:30				17:30		
18:00				18:00			18:00			18:00

FOSDEM venue:
 ULB Campus Solbosch
 Avenue Franklin D. Roosevelt 50
 1050 Brussels, Belgium
