

# Community at Scale

A Tactical Overview of How to Grow Your  
FOSS Project

Leslie Hawthorn (@lhawthorn) - Lydia Pintscher (@nightrose)

**Why does it  
matter?**

**Your community  
is a snowflake  
(and so are ours)**

**Don't go on like  
nothing is happening  
(act now)**

**Choose your  
infrastructure  
wisely**

**Make sure the  
project survives  
when people leave**

**Find areas with a  
low bus-factor pro-  
actively**

**Create a legal  
entity**

# **Fiduciary Licensing Agreements**

**Recreate  
community feeling  
on a smaller scale**

**Make it possible  
to not know  
everything**

**Pro tip:  
community story  
time**

**Make it  
easy to join**

**Make it easy  
to leave**

**Know your  
dependencies  
(and diversify)**
