Add/Delete	Supported	Supported
Move	Supported	Unsupported
Edit text	Supported <sup>5</sup>	Supported
Format	Unsupported	Unsupported
<b>Charts</b>		
Add/Delete	Supported <sup>6</sup>	Supported
Move	Supported	Supported
Edit Content	Unsupported	Unsupported
Format	Unsupported	Unsupported

<sup>1</sup> Change from paragraph to header is not tracked in implementation (e.g. AO 4.0.1), list changes complicated. Note both list and header are types of paragraphs.

<sup>2</sup> **Yellow background** marks missing format tracking in ODF

<sup>3</sup> **Orange background** marks missing table row/column/cell tracking in ODF text documents. There is change-tracking in ODF for spreadsheets, as [http://docs.oasis-open.org/office/v1.2/os/OpenDocument-v1.2-os-part1.html#element-table\\_tracked-changes](http://docs.oasis-open.org/office/v1.2/os/OpenDocument-v1.2-os-part1.html#element-table_tracked-changes)

<sup>4</sup> Deletion of images and shapes is supported since those elements are allowed within text:deletion (see [http://docs.oasis-open.org/office/v1.2/os/OpenDocument-v1.2-os-part1.html#element-text\\_deletion](http://docs.oasis-open.org/office/v1.2/os/OpenDocument-v1.2-os-part1.html#element-text_deletion))

<sup>5</sup> Although change marks are not allowed within elements from the *draw* namespace, Text edits are allowed within a paragraph (*text:p*) within shapes. Therefore supported by ODF 1.2, still unsupported by LO/AO.

<sup>6</sup> The insertion, deletion and moving of charts & images are supported given they are referenced in the text content via a *draw:frame*.
