

CUMIN

Riccardo Coccioli

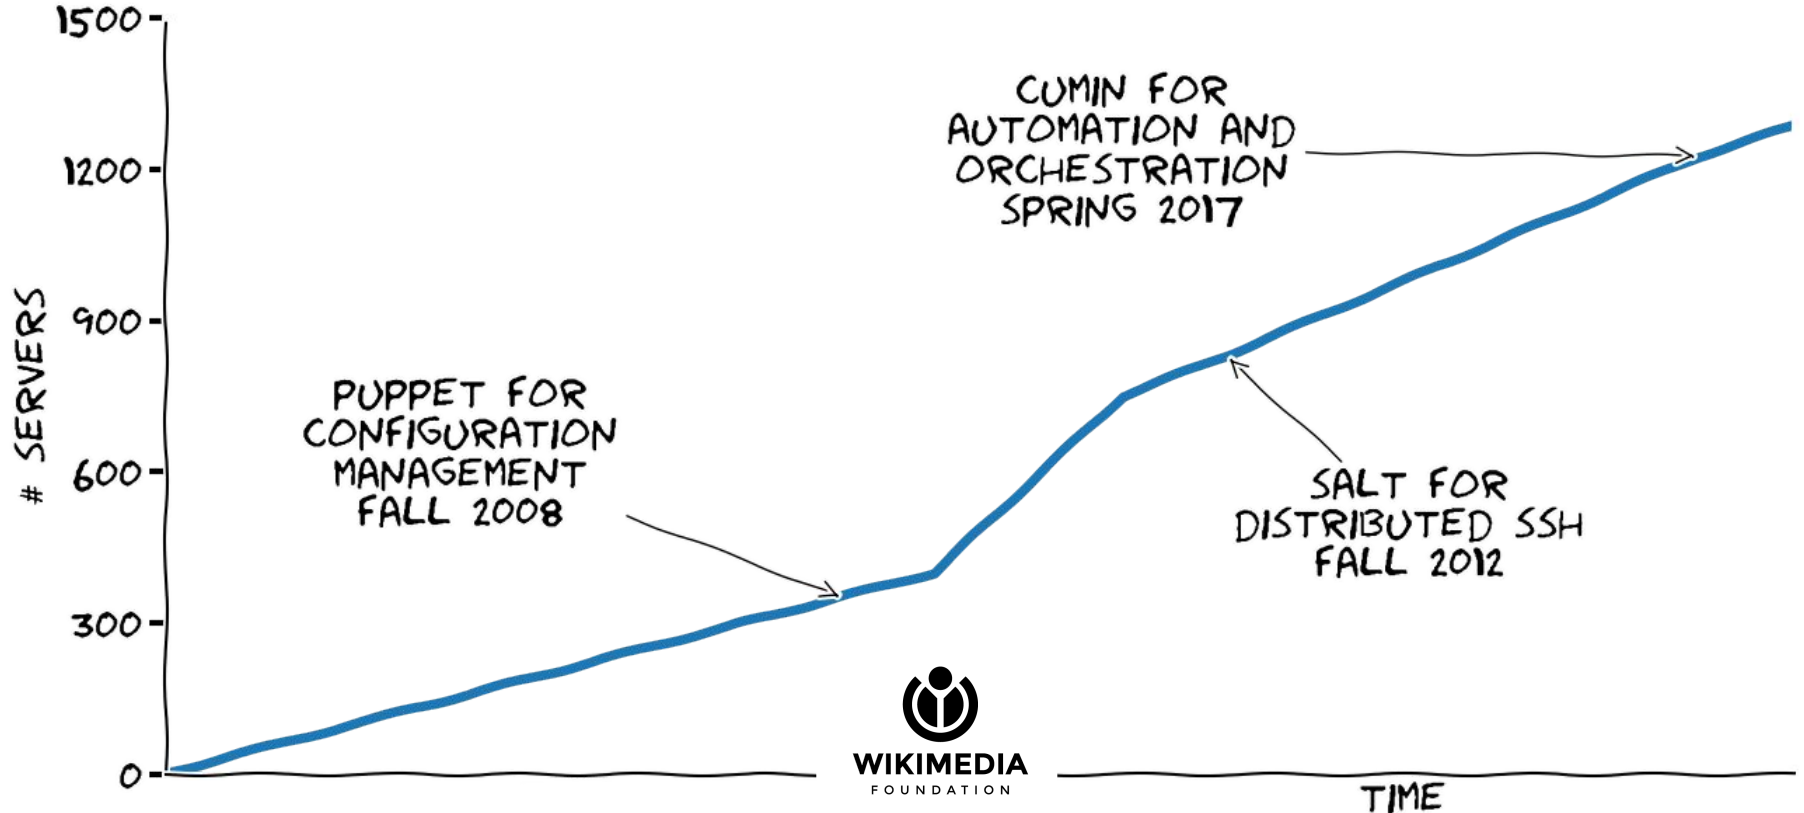

WIKIMEDIA
FOUNDATION

Automation & Orchestration made ~~easy~~ possible?

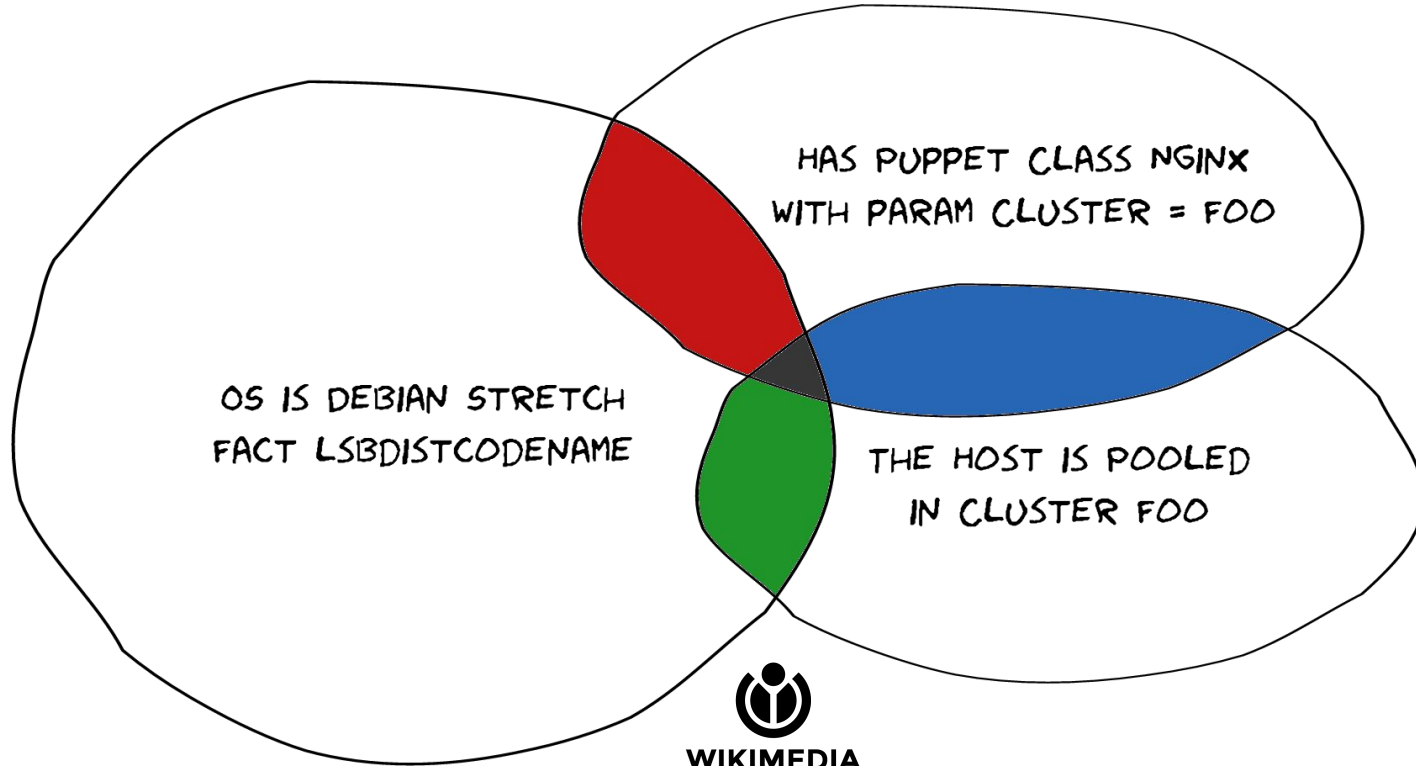

Agenda

- What problems is Cumin solving
- Main components: backends, grammar and transports
- Execution strategies and other features
- Demo time

How we got here

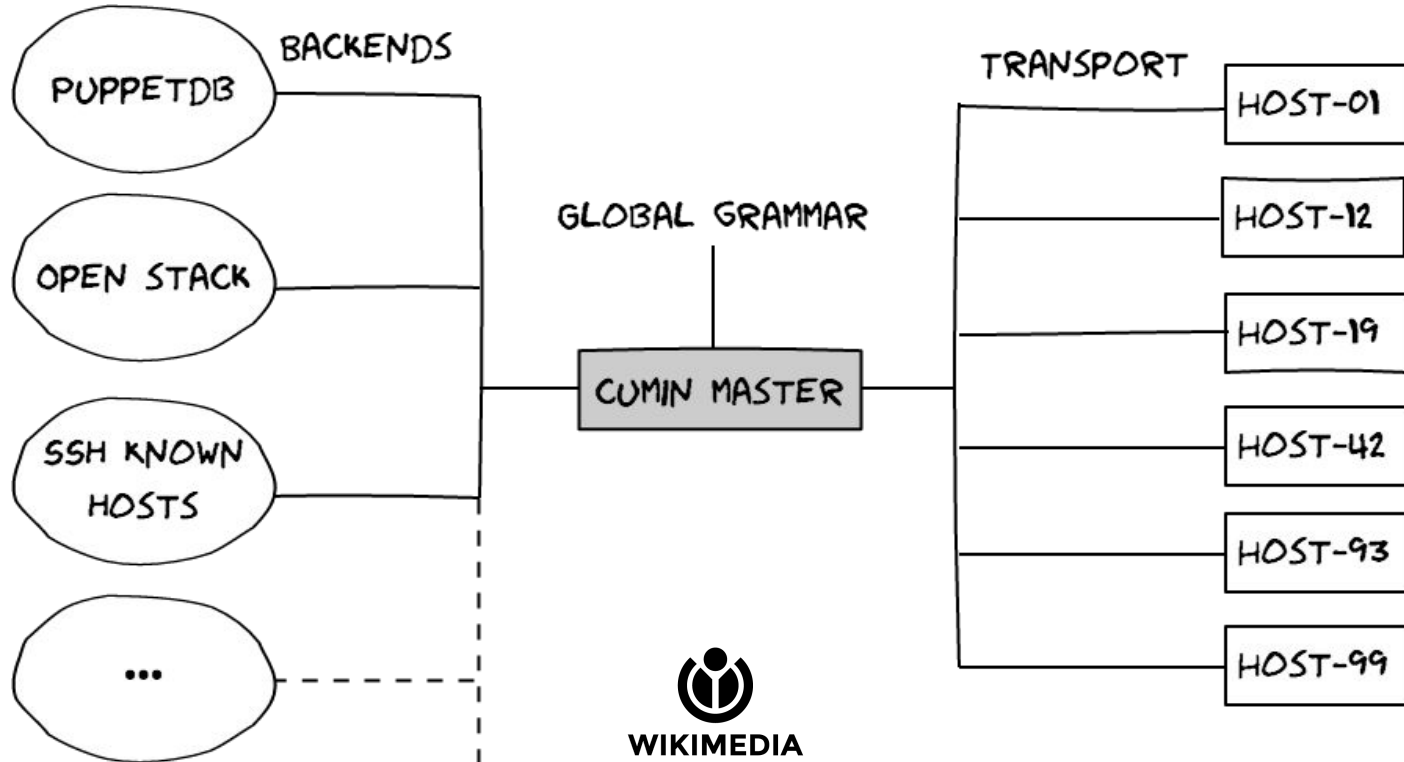

What we wanted

What we wanted

Cumin components

Cumin features

BATCH SIZE
VALID EXIT CODES
PER HOST TIMEOUT

OUTPUT FORMATS

SUCCESS PERCENTAGE

EXECUTION STRATEGIES

GLOBAL TIMEOUT

BATCH SLEEP

INTERACTIVE

Demo time

Cumin allows to

- Powerful query syntax to select hosts
- Multiple execution strategies
- Smartly aggregate outputs and reliably report failures
- Use it from CLI or as a Python framework
