

# Configuration Revolution

Why it needed 13 years and how it will be done

---

*FOSDEM 2018*

*Main Track*

Markus Raab <[markus@libelektra.org](mailto:markus@libelektra.org)>

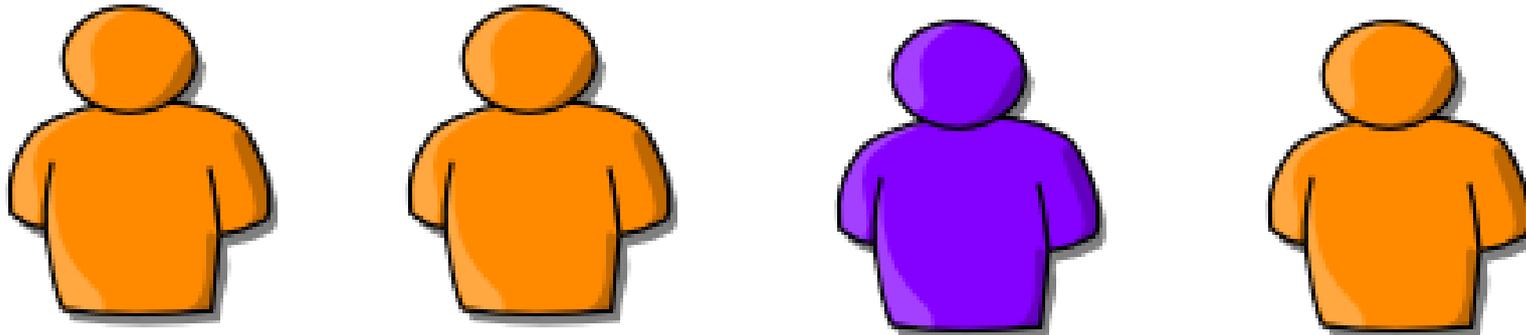

<https://www.libelektra.org>

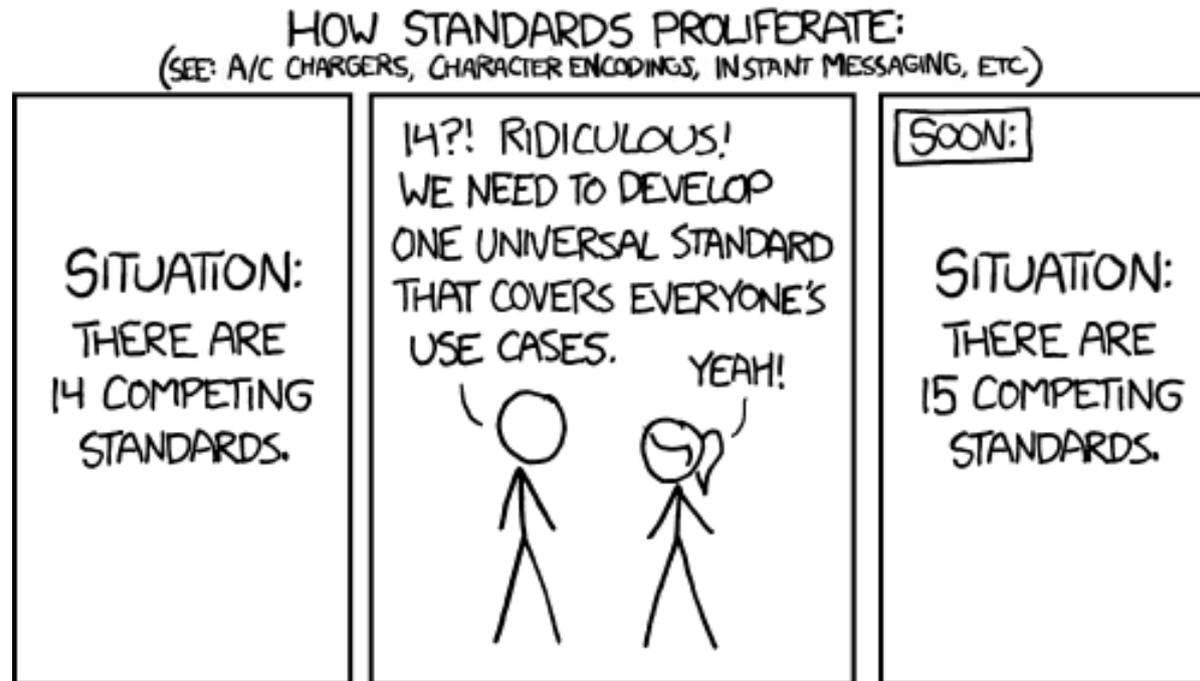

# Time is valuable

---

➤ *25% reinvented the same wheel (me included)*

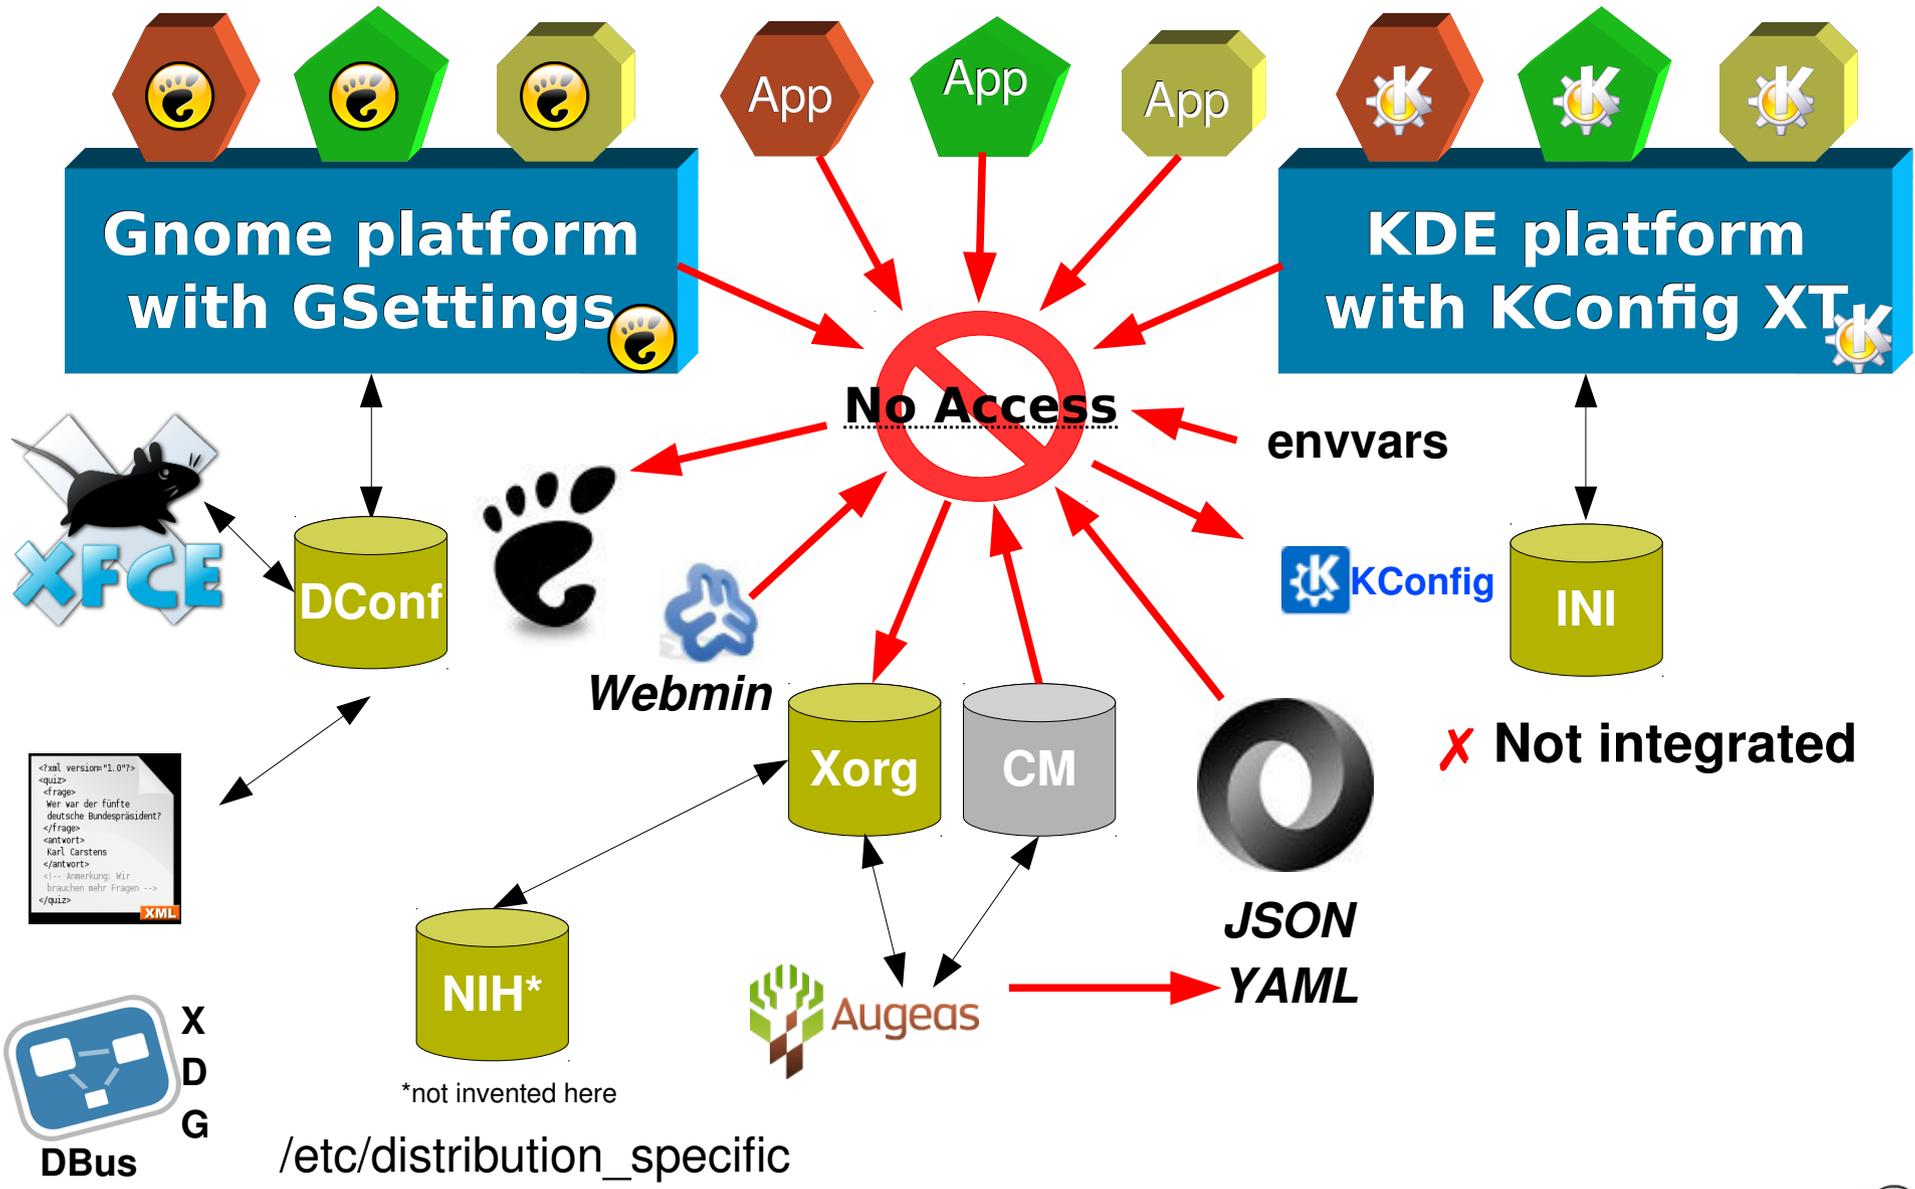

# How to (not) change the situation?

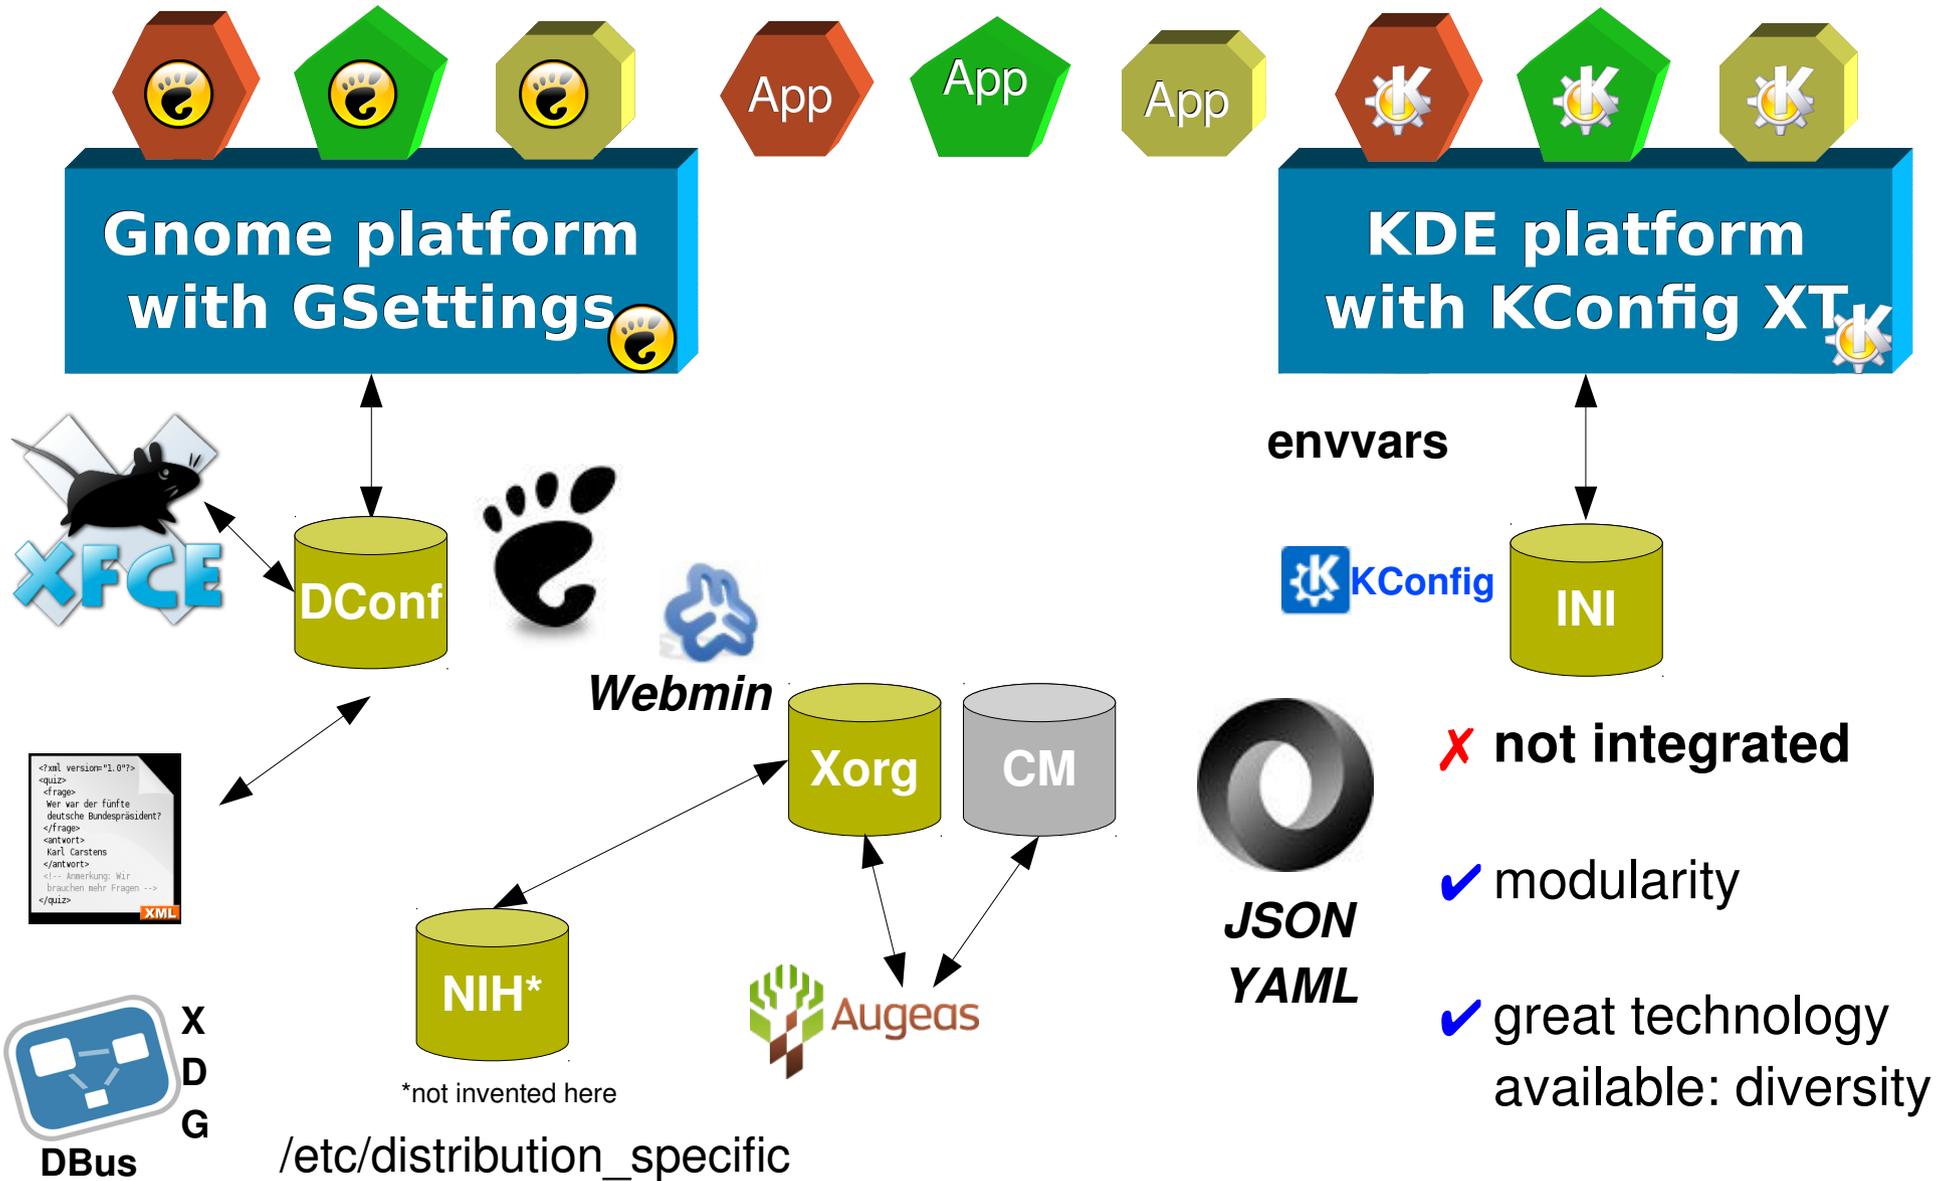

(thanks to xkcd.com)

# What is **wrong** with Configuration?

# What is right with Configuration?

# Misconfiguration

*configuration is a user interface*

*not only for **developers** but also:*

- for **end users** and
- for **system administrators**

*misconfiguration often lead to **system failures***

# Ladder of Abstraction

➤ *Abstract Nonsense*

➤ ...

➤ *Config Management*

➤ ***Key/Value Specification***

➤ *Key/Value Registry*

➤ *File System*

➤ *Block Devices*

➤ *Bits on Harddisc*

# Content for Today

- I. Introduction
- II. Popular Ways for Configuration
- III. Trend in Number of Configuration Options
- IV. Configuration Specification (Demo)
- V. Elektra

## II. Popular Ways for Configuration

---

Questions? <https://issues.libelektra.org/1808>

Markus Raab <[markus@libelektra.org](mailto:markus@libelektra.org)>

<https://www.libelektra.org>

# What we did

## ➤ *Online Questionnaire*

➤ from 672 persons 286 gave answers, 162 completed

## ➤ *Source Code Analysis*

➤ 50 million LOC

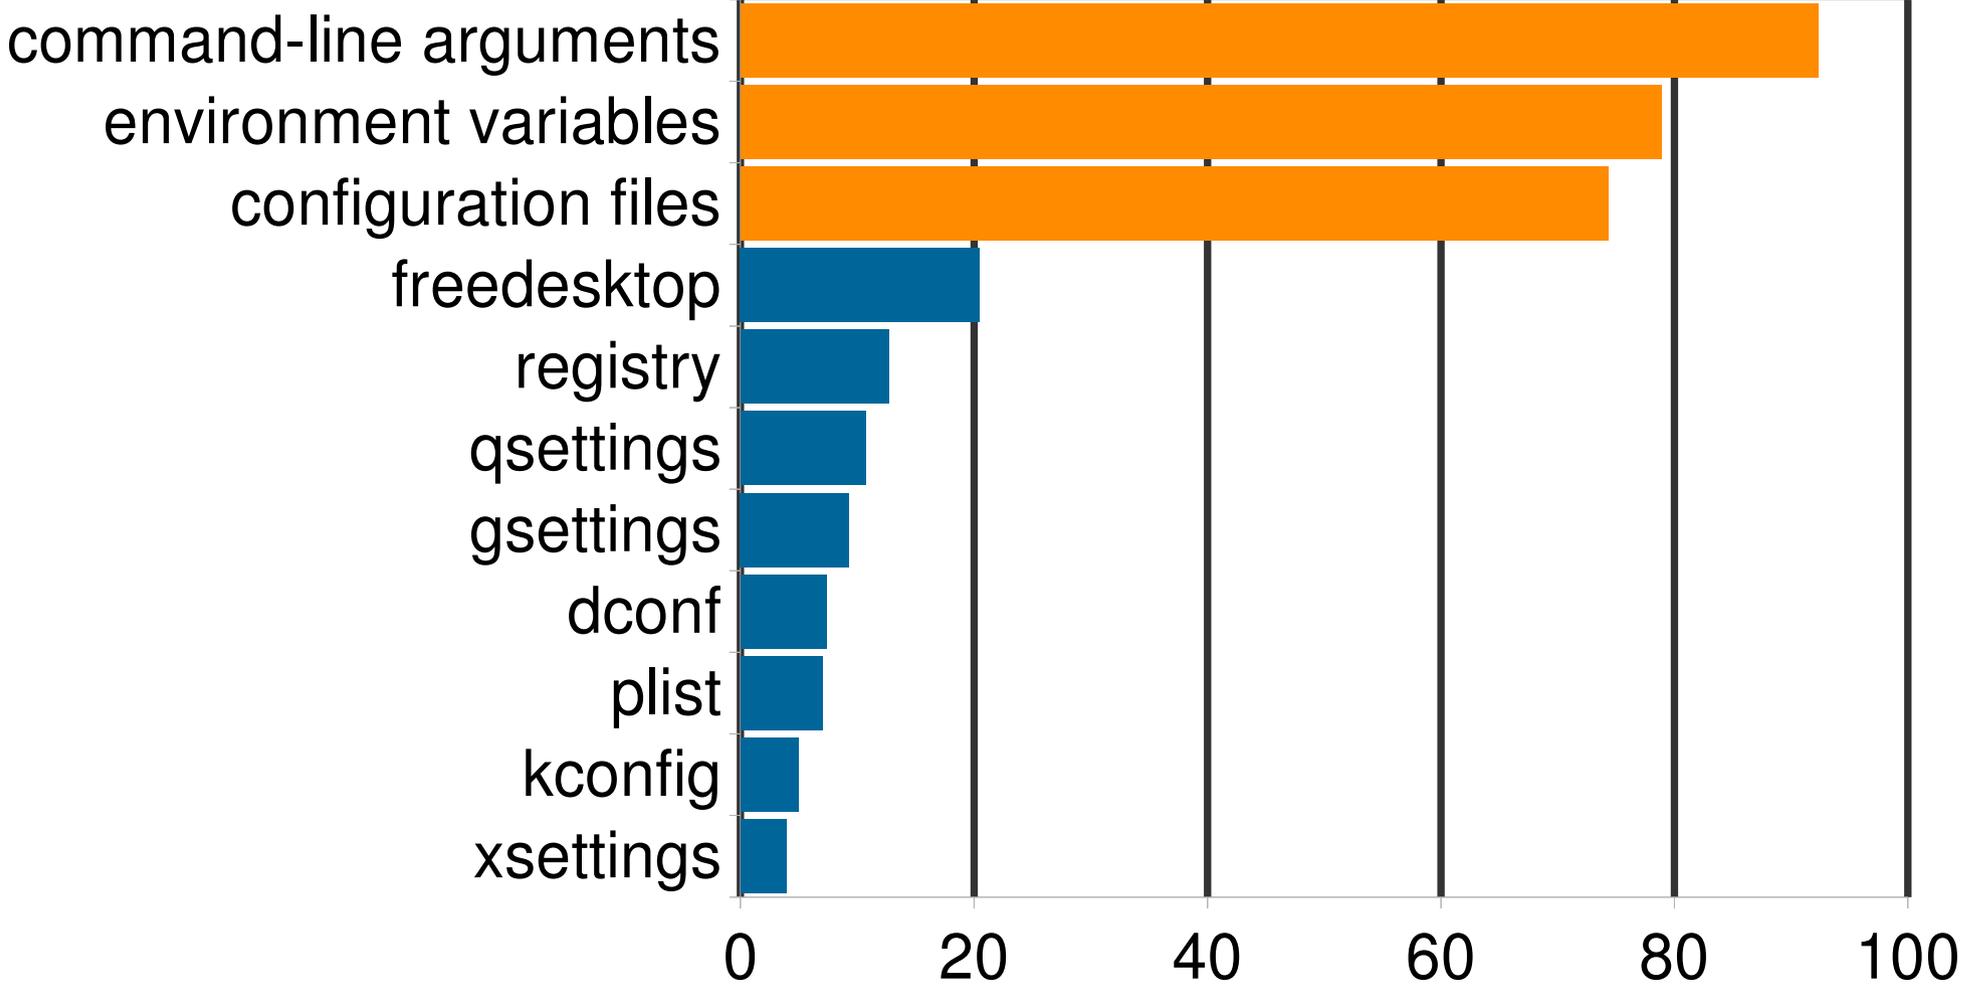

<b>Application</b>	<b>Domain</b>	<b>Application</b>	<b>Domain</b>
0ad	Game, Network	Gimp	Desktop
Akonadi	Server, Network	Inkscape	Desktop
Chromium	Browser, Mobile	Ipe	Desktop
Curl	Command-line, Network	LibreOffice	Desktop
Eclipse	Development	Lynx	Browser
Evolution	Development	Man	Command-line
Firefox	Browser, Mobile	Smplayer	Desktop
GCC	Development	Wget	Command-line, Network

## ➤ *Case Study+User Study (presented tomorrow 12:30)*

<https://www.libelektra.org>

# And the Winners are...

# Abstraction: Cascading Namespaces

---

[/sw/org/myapp/#0/current](#) uses all of below (cascading):

- ◆ [proc](#) namespace is for the current process (**cmdline+env**)
- ◆ [dir](#) namespace is stored in cwd like .git or .htaccess
- ◆ [user](#) namespace is stored below [~/.config/](#)
- ◆ [system](#) namespace is stored below [/etc/config/](#)

# Abstraction: Key/Value

➤ *INI*

➤ *XMLTool*

➤ *Augeas:*

➤ Hosts

➤ Fstab

➤ *XML*

➤ *JSON*

➤ *YAML*

➤ *Line*

➤ *CSV*

➤ *Hosts*

➤ ...

```
[env]
ls = ls -FH
vnc = vncserver
```

```
<?xml version="1.0"
encoding="UTF-8"?>
<keyset xmlns=""
xsi:schemaLocation=""
parent="user/env/alias">
<key basename="ls"
type="string"
value="ls -Fh"
<comment></comment>
</key>
<key basename="vnc"
type="string">
<value>vncserver
</value>
<comment></comment>
</key>
</keyset>
```

key/value abstraction  
is not enough

### III. Trend in Number of Configuration Options

---

Questions? <https://issues.libelektra.org/1808>

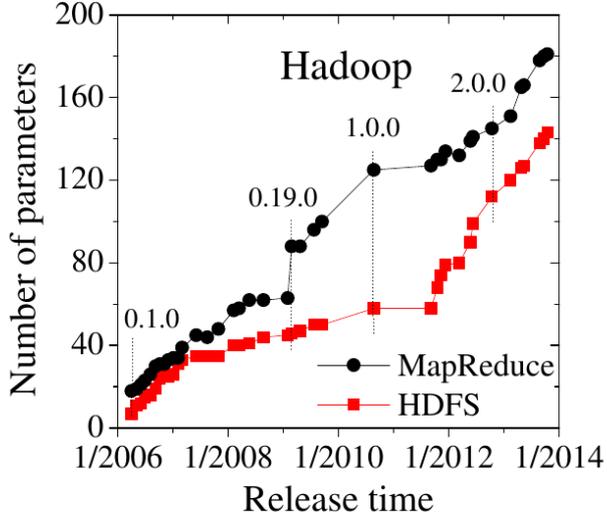

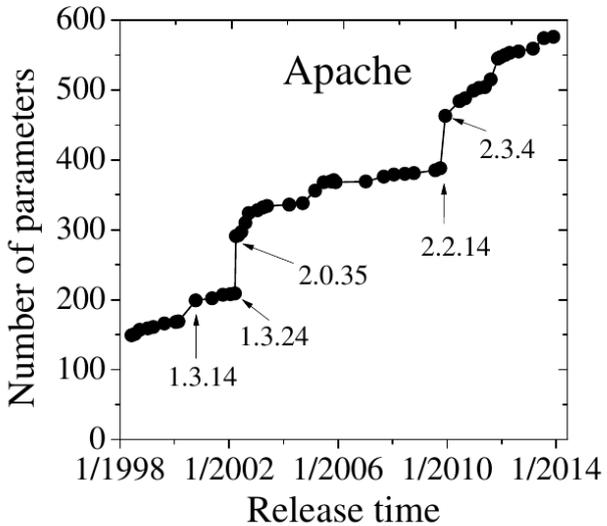

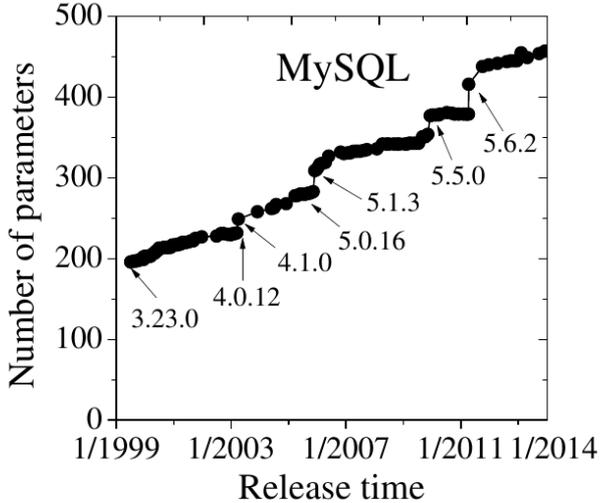

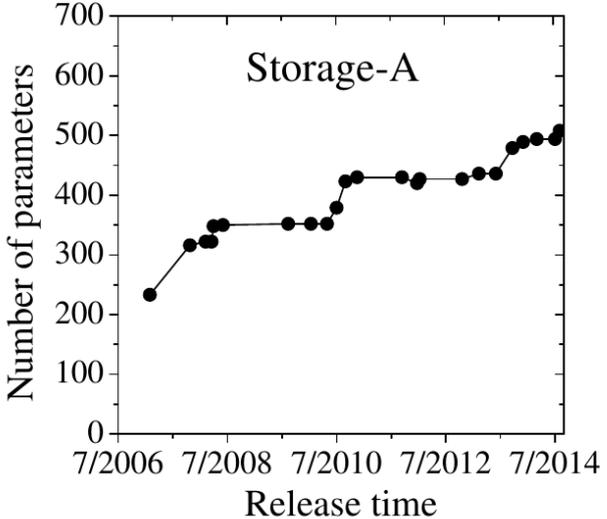

Markus Raab <[markus@libelektra.org](mailto:markus@libelektra.org)>

<https://www.libelektra.org>

# Trend (1)

(thanks to Tianyin Xu)

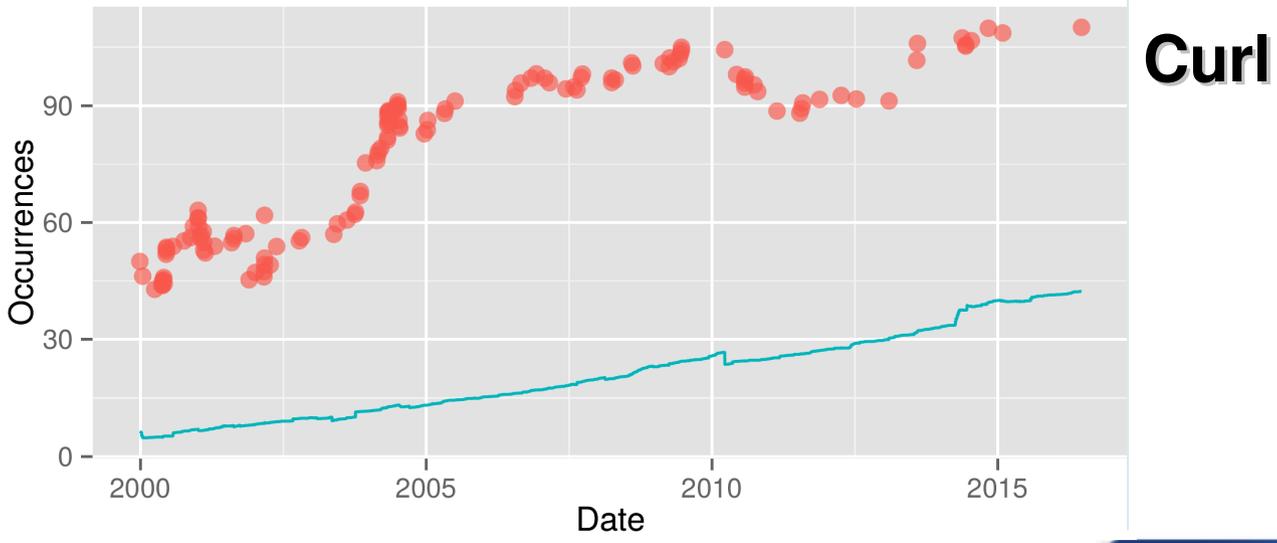

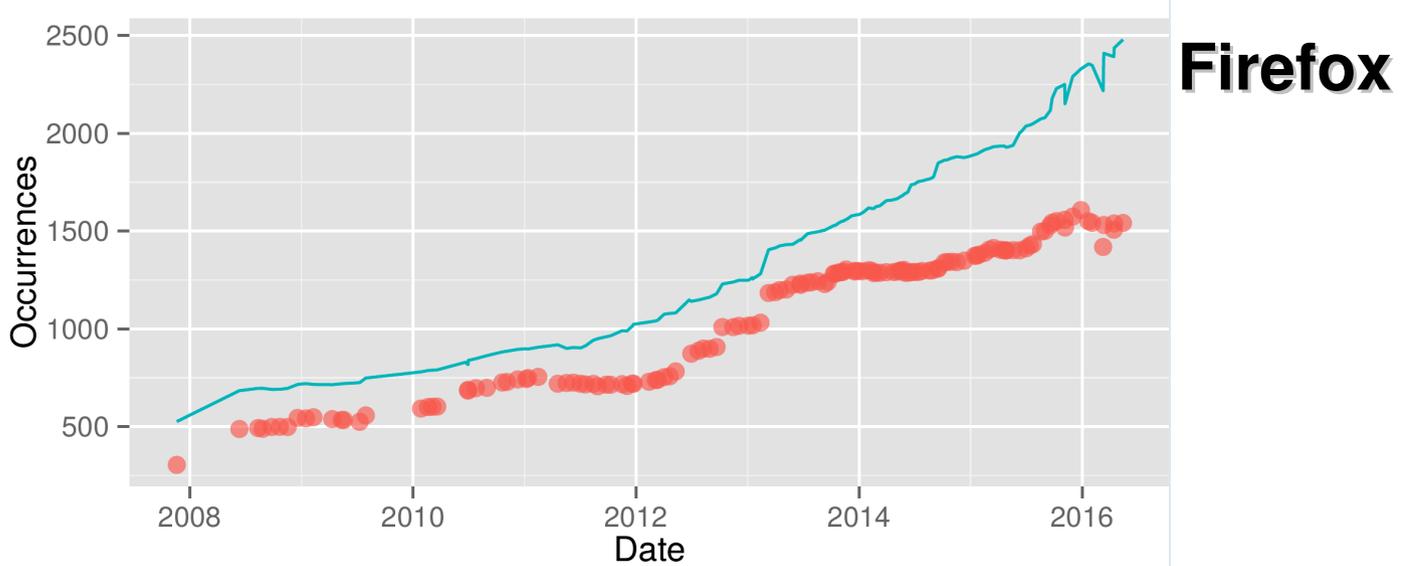

➤ 52% of configuration options are rarely used

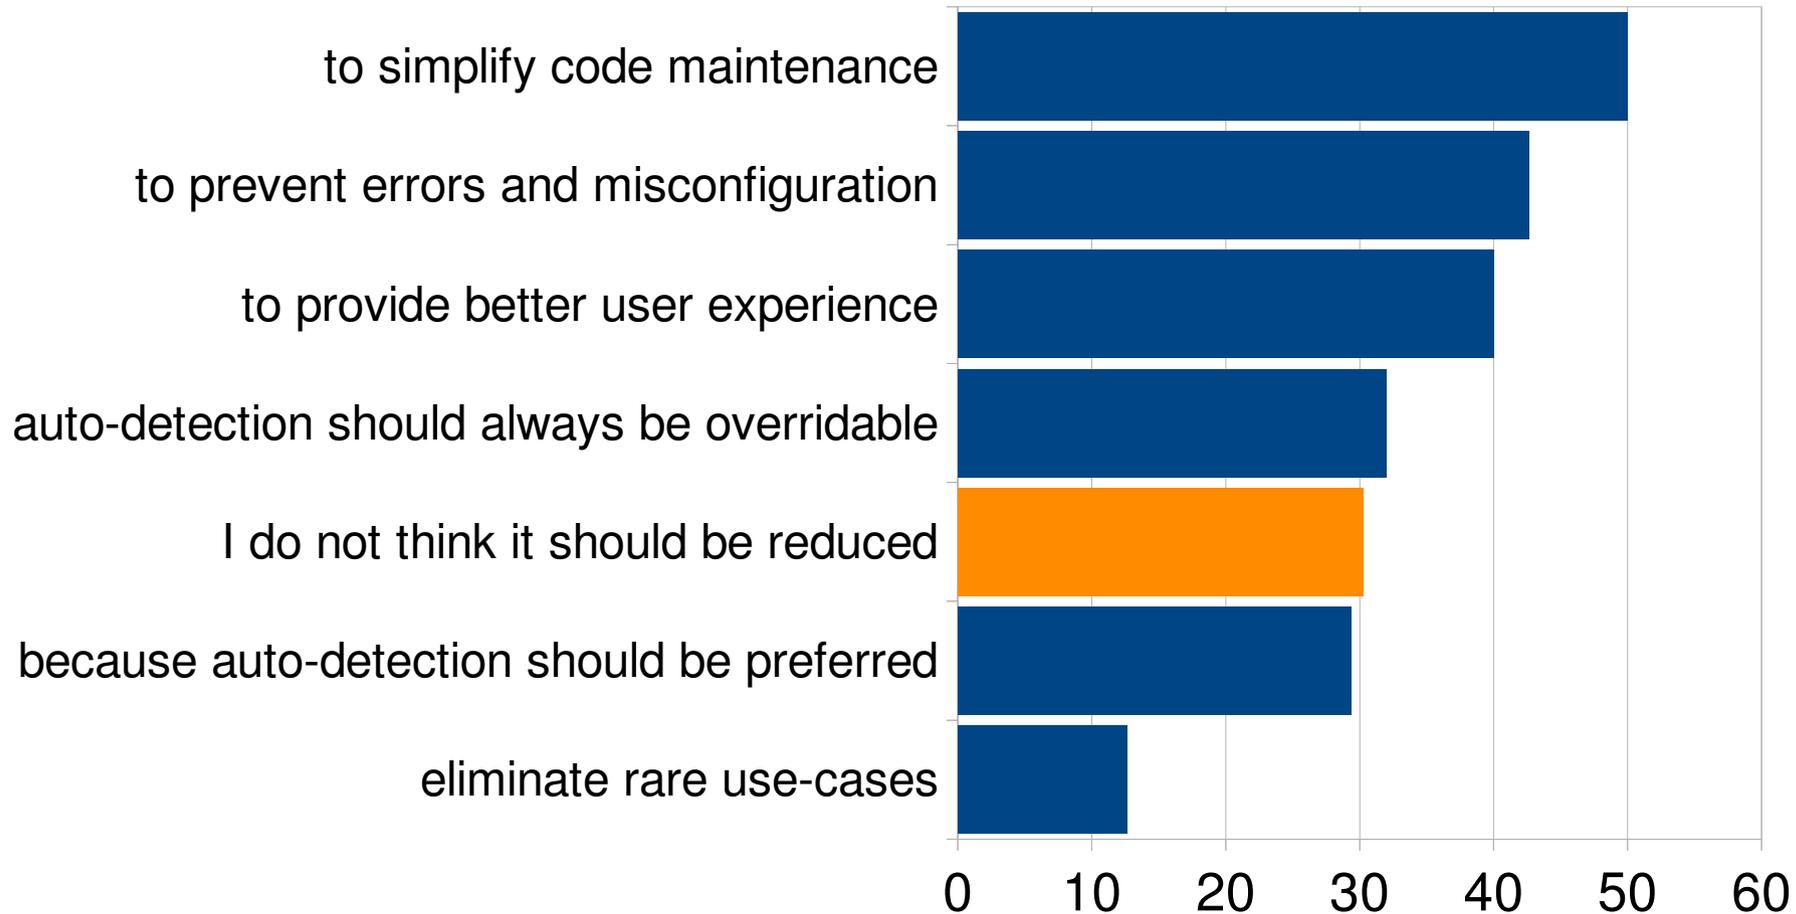

# Trend (2)

➤ For environment vars/*getenv* we have a similar trend

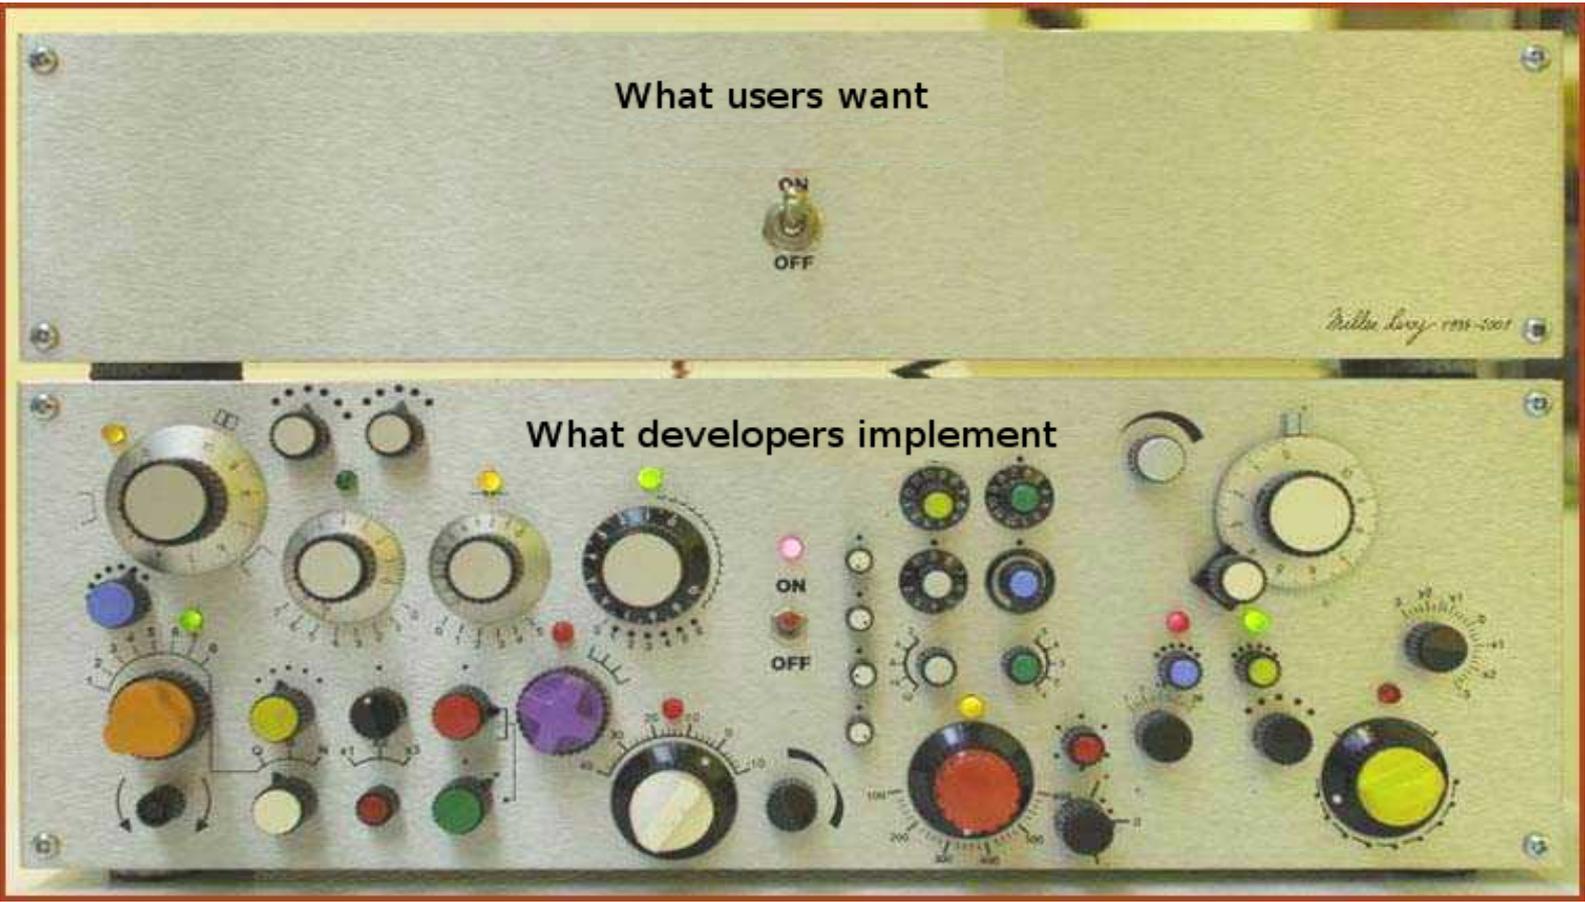

# Then let us reduce

Why do you think configuration should be reduced?

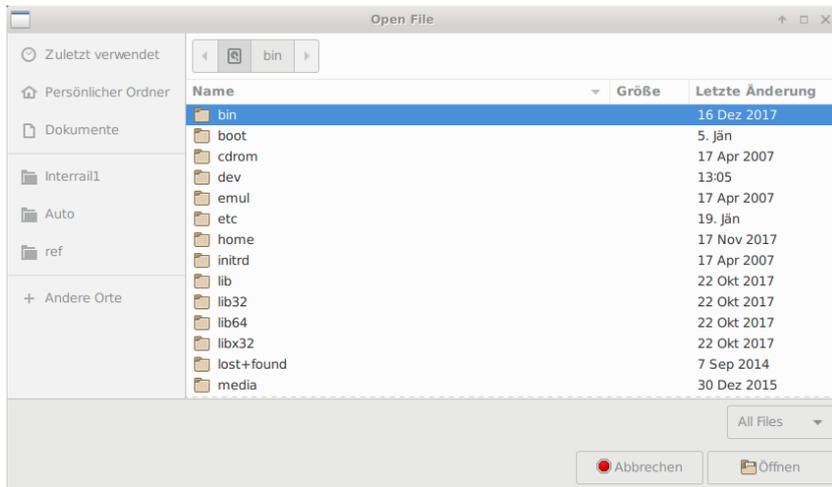

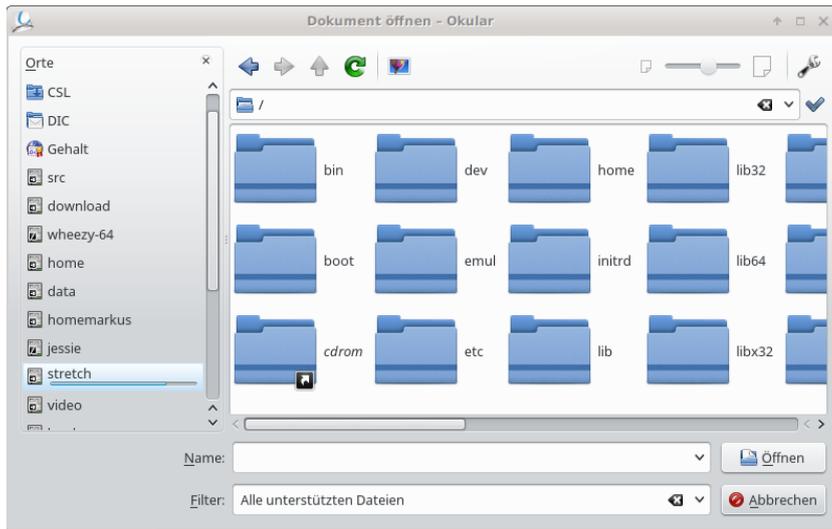

# Current Situation

# XServer GPSd

# Customization is needed everywhere

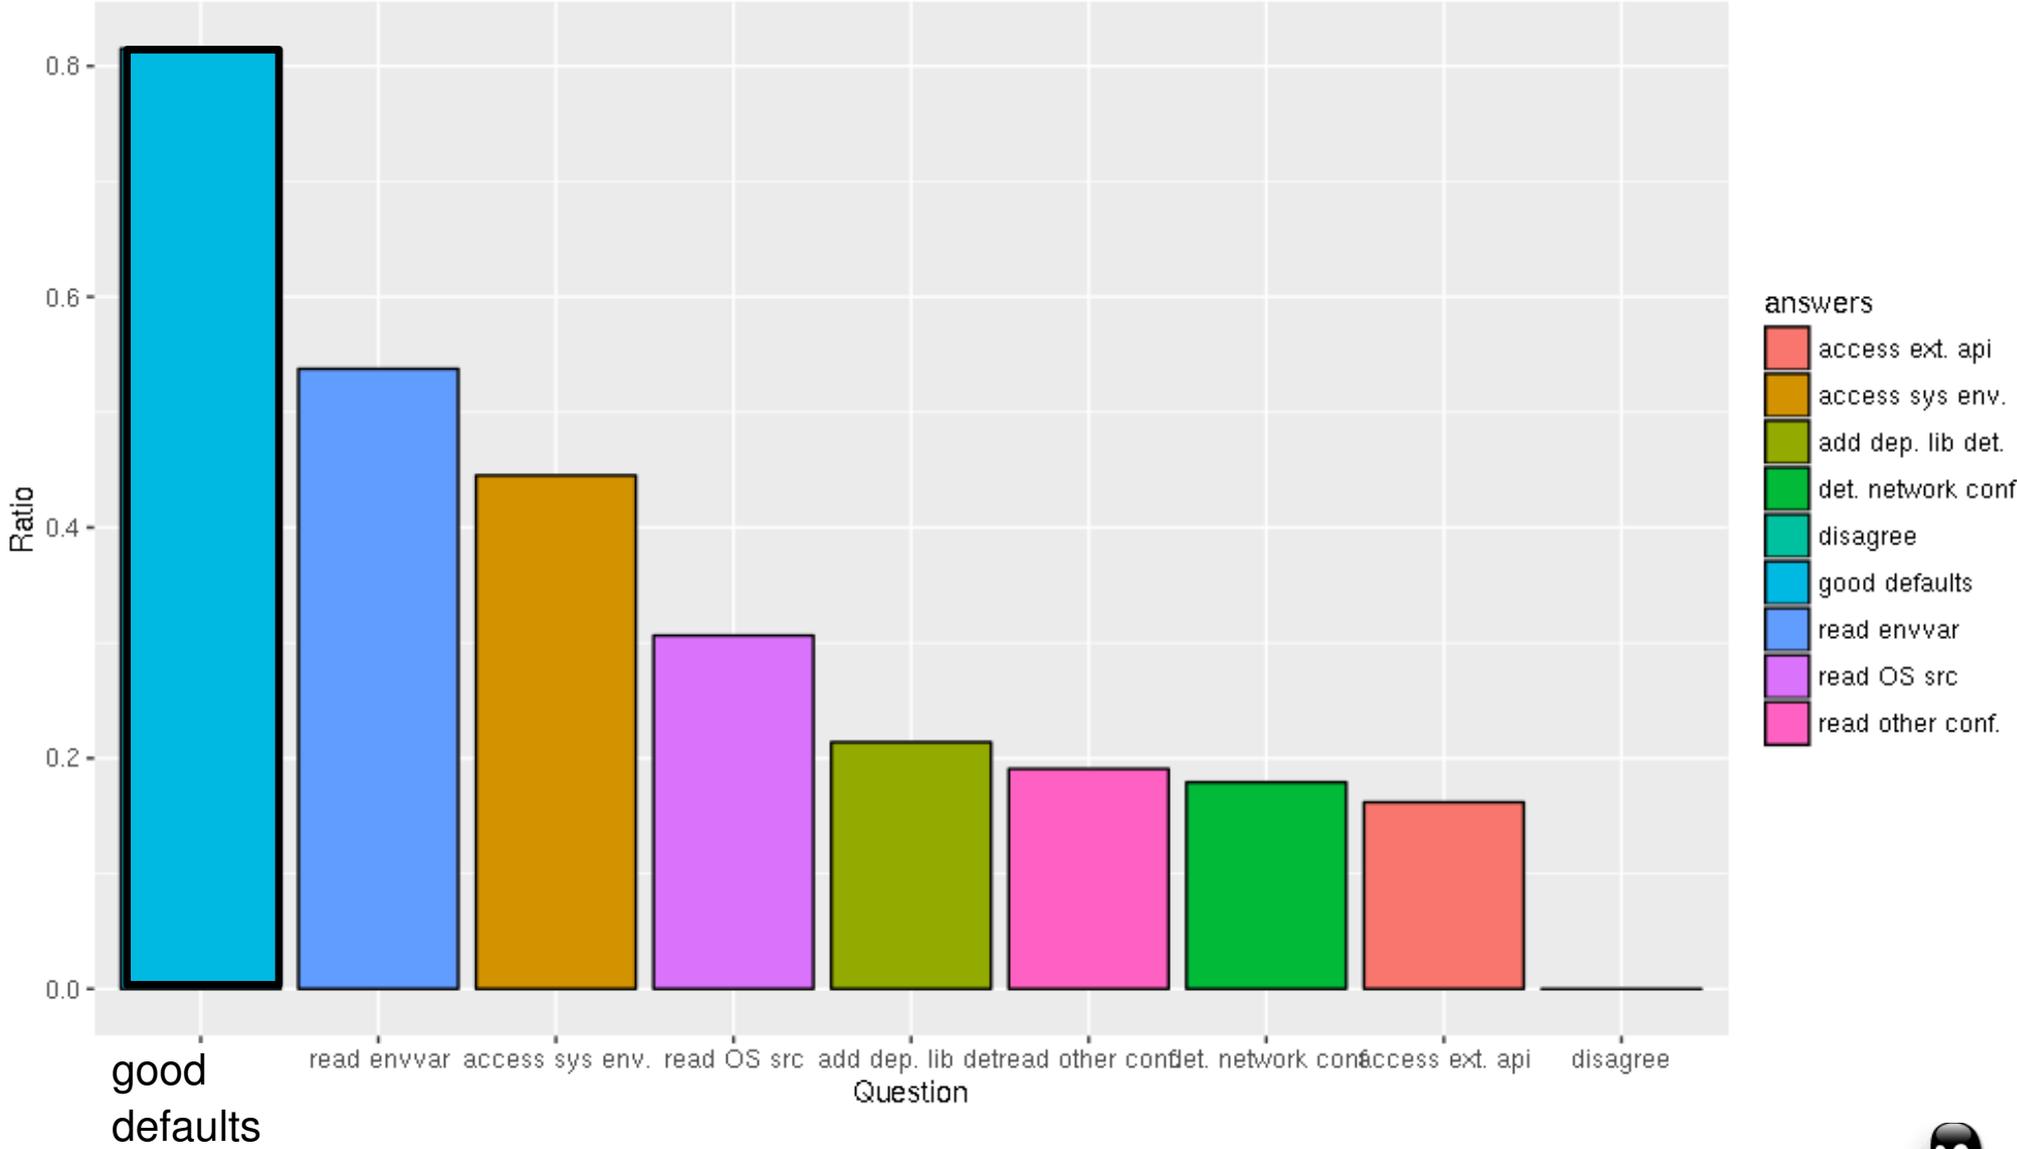

- *Shortcuts*
- *EditorConfig*
- *Favourite Places*
- *Language*
- *Power Management*
- *Sorting Criteria*
- *Size of Icons*
- *Proxy Settings*
- ...

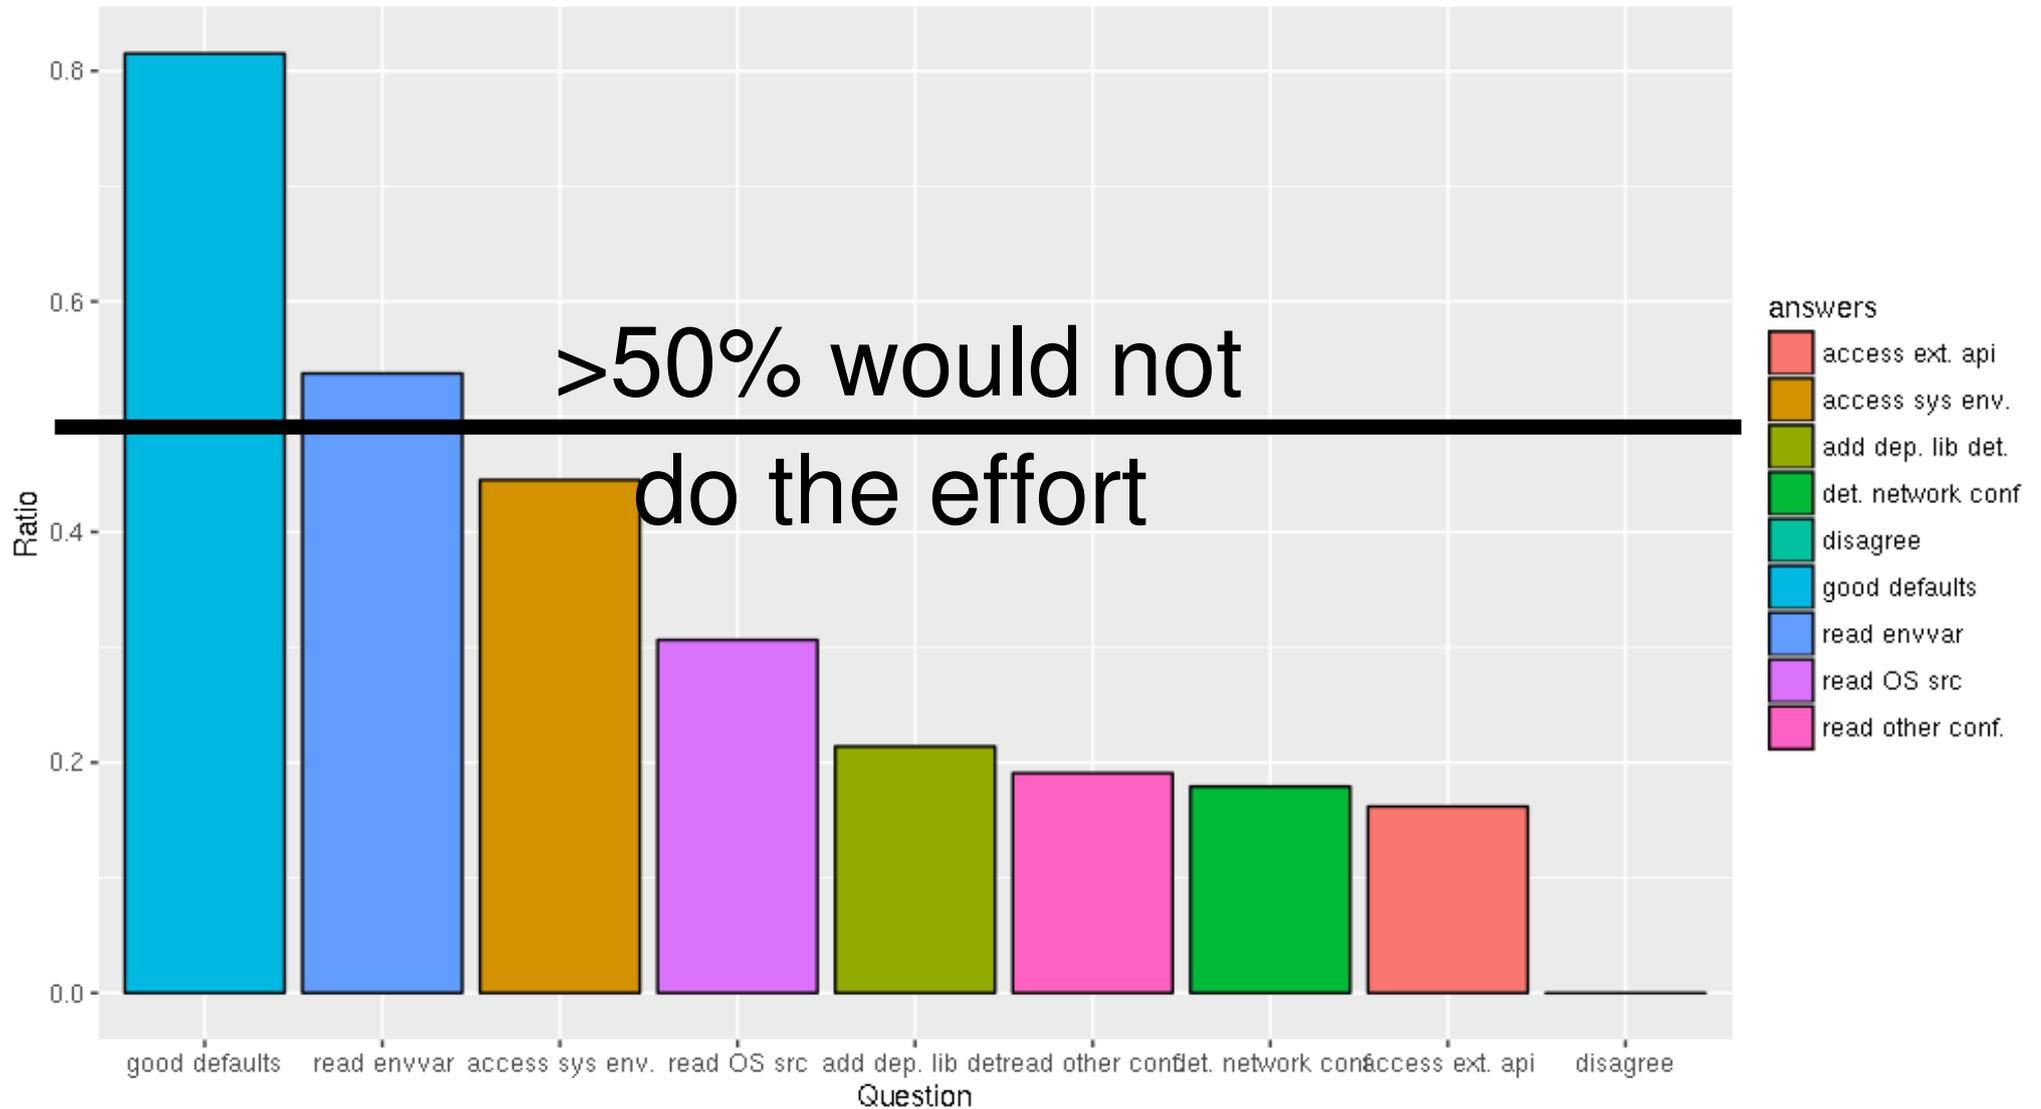

# Good Defaults

Which effort do you think is worthwhile for providing better configuration experience?

# Detection of other sources

Which effort do you think is worthwhile for providing better configuration experience?

# Cascading Namespaces (again)

---

*/sw/org/myapp/#0/current* uses all of below (cascading):

- ◆ ***spec*** namespace allows you to specify default values, validations, overrides, visibility, etc. (via metadata)
- ◆ ***proc*** namespace is for the current process (**cmdline+env**)
- ◆ ***dir*** like .git or .htaccess
- ◆ ***user*** namespace is stored below *~/.config/*
- ◆ ***system*** namespace is stored below */etc/config/*

# IV Configuration Specification

---

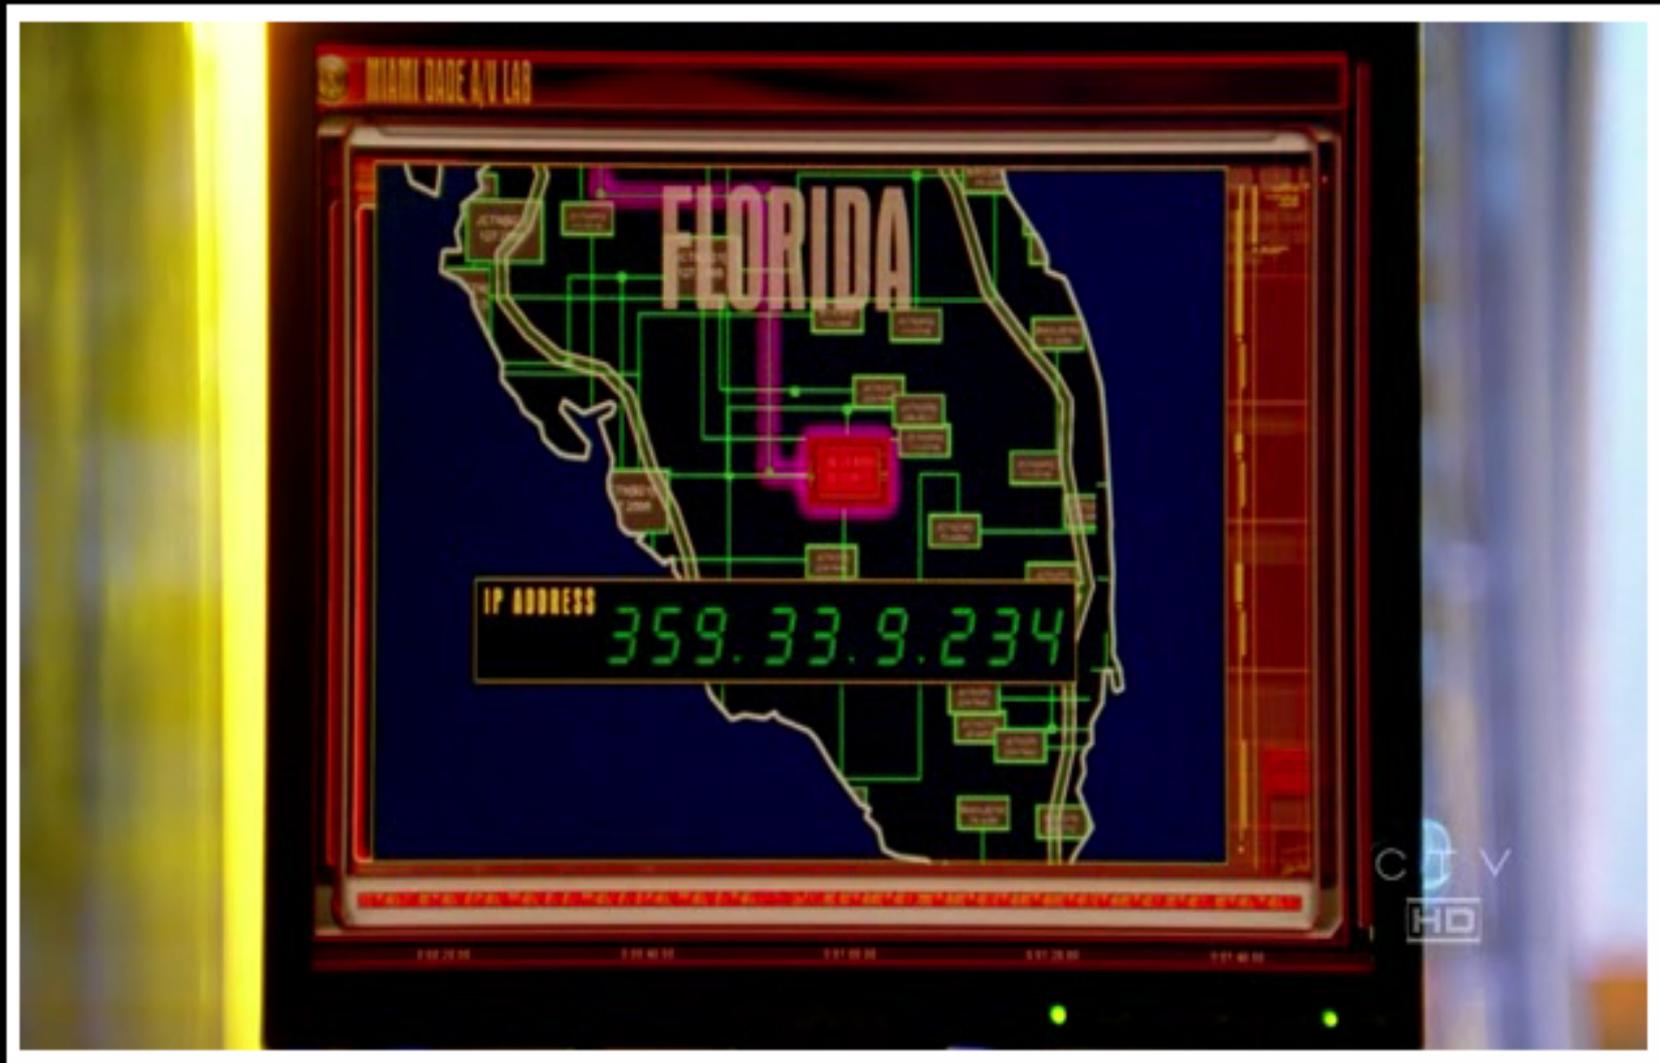

Questions? <https://issues.libelektra.org/1808>

Markus Raab <[markus@libelektra.org](mailto:markus@libelektra.org)>

<https://www.libelektra.org>

# Back to Misconfiguration

IPv4, 5  
CSI has it

# State of the Art

User sw77 [CC BY-SA 2.0] via flicker

## Use the source

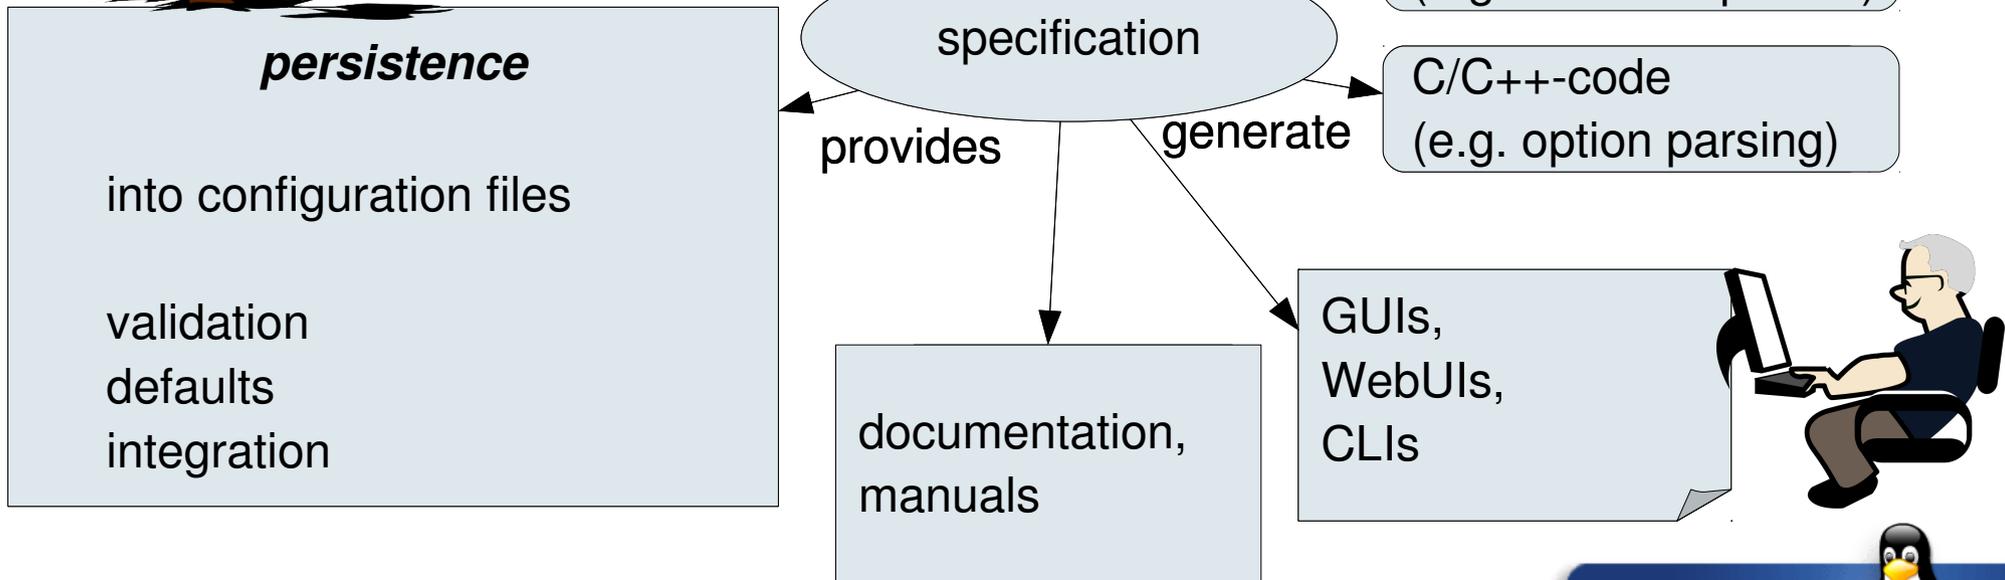

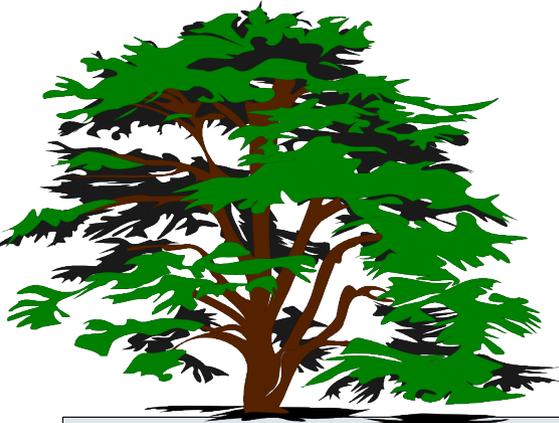

```
1563 case CFG_LTHREADS:
1564 >-----{ int mask = 0;
1565 >-----/* use a power of two */
1566 >-----while (c->value_uint > 1) {
1567 >----->-----c->value_uint >>= 1;
1568 >----->-----mask <<= 1;
1569 >----->-----mask |= 1;
1570 >-----}
```

<https://www.libelektra.org>

# Specification

```
[  
  mountpoint = /etc/hosts  
  infos/plugins = hosts  
[ipv4/localhost]  
  type = ipv4  
  default = 127.0.0.1  
  check/ipaddr = ipv4  
  check/validation = ^127\..*  
  check/validation/message = "localhost ip must  
    be within 127.0.0.0/8"
```

**DEMO**

**Markus Raab <[markus@libelektra.org](mailto:markus@libelektra.org)>**

**Thomas Waser <[thomas.waser@tuwien.ac.at](mailto:thomas.waser@tuwien.ac.at)>**

***<https://www.libelektra.org>***

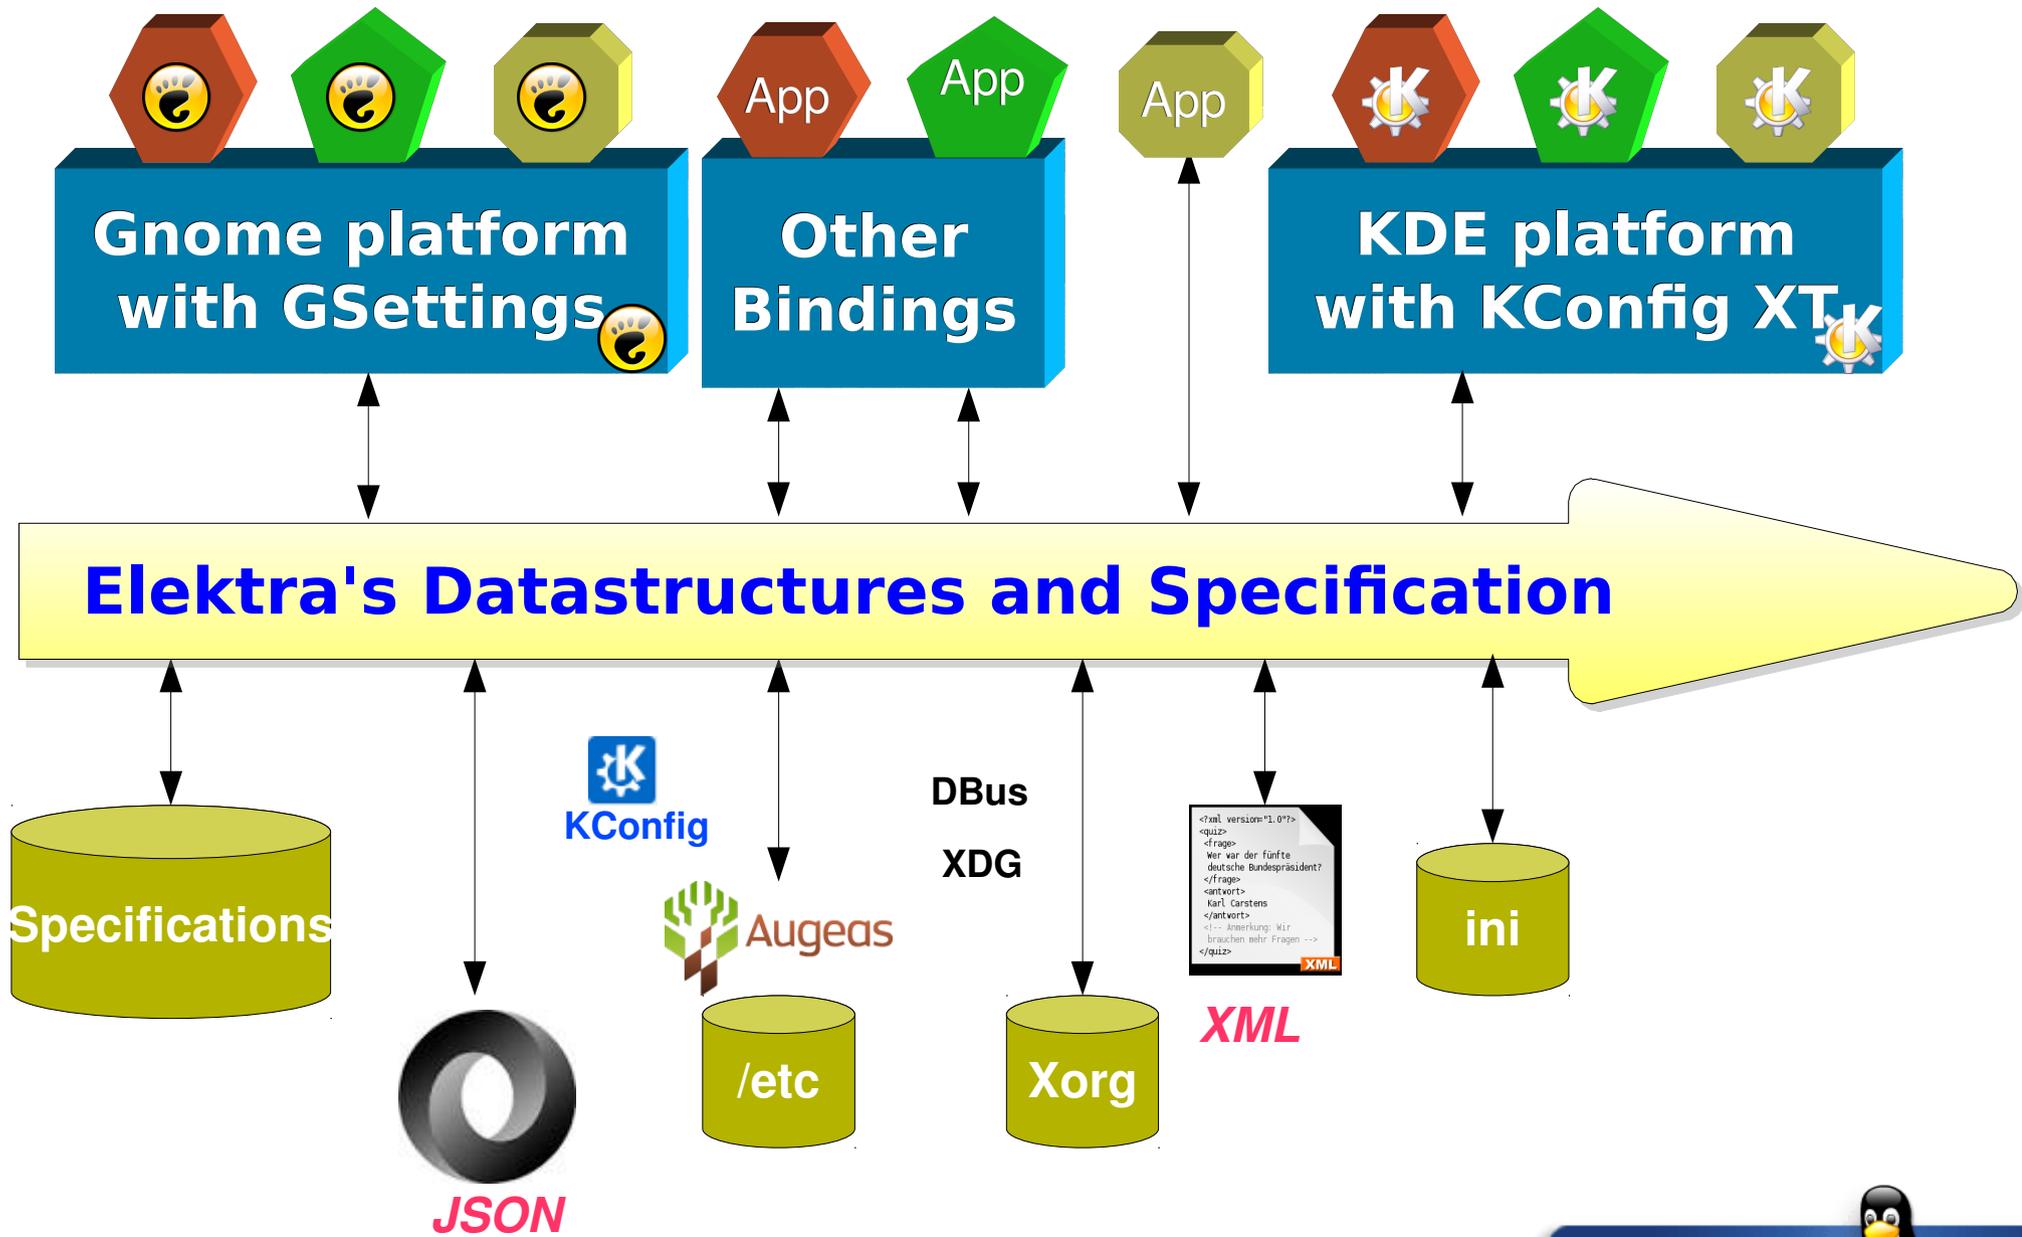

***introspection***

***reusable***

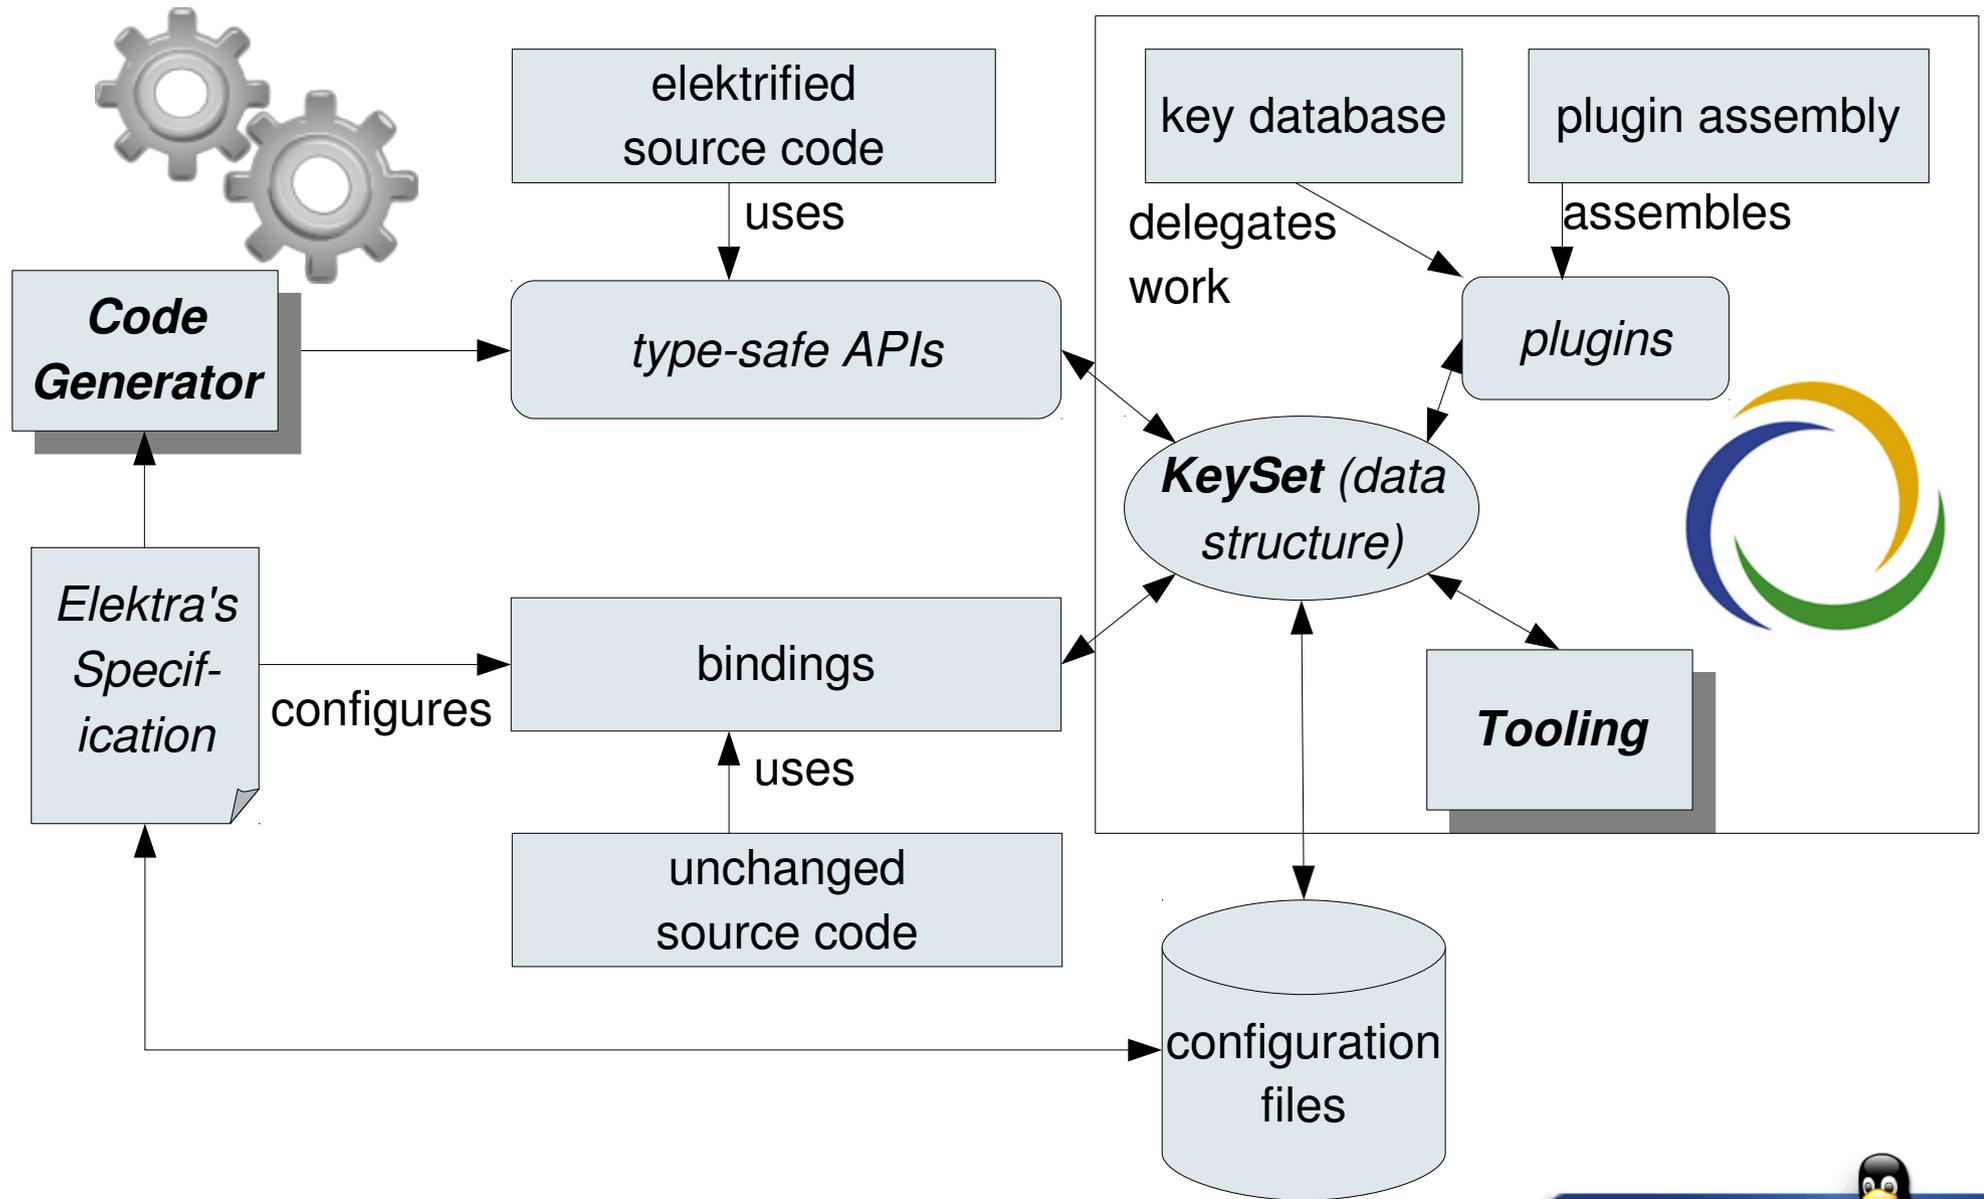

***safe***

# Technology Integration

# Ways to use Elektra (“Elektrify”)

## V. Elektra

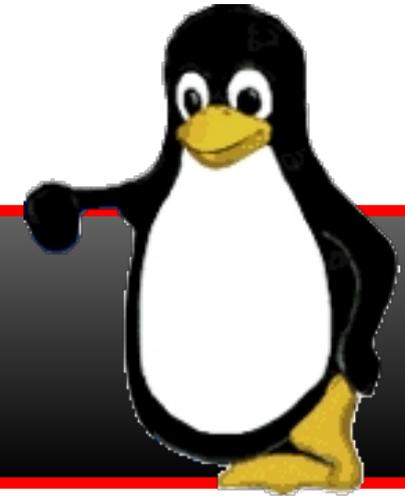

Questions? <https://issues.libelektra.org/1808>

Markus Raab <[markus@libelektra.org](mailto:markus@libelektra.org)>

<https://www.libelektra.org>

# What is libelektra?

```
sh$ ldd /lib/libelektra.so
libc.so.6 => /lib/tls/libc.so.6
/lib/ld-linux.so.2 => /lib/ld-linux.so.2
```

- ✓ *small, fast library*
- ✓ *access to global configuration*
- ✓ *portable, no deps required (ANSI C)*
- ✓ *no daemon: security by OS*

<https://www.libelektra.org>

# Available Bindings

---

## ➤ Language

- ✓ C/C++
- ✓ Shell
- ✓ Lua
- ✓ Python
- ✓ Java
- ✓ Ruby
- ✓ Haskell

## ➤ Interception

- ✓ Getenv
- ✓ GSettings
- ✓ Filesystem

# The *kdb* Command

---

```
$ kdb get /filesystems/boot/mpoint  
  
# kdb set /sw/xorg/Screen/Display/Modes 1280x1024  
  
$ kdb editor system/sw/xorg/
```

- Perfect for scripts: administrative work+package install
- **Easy** to write tools like this
- Also for **specifications!** It has **tab completion!**

# Web UI and GUIs

# Future Work

*misconfiguration database*

*fail-safe user interface*

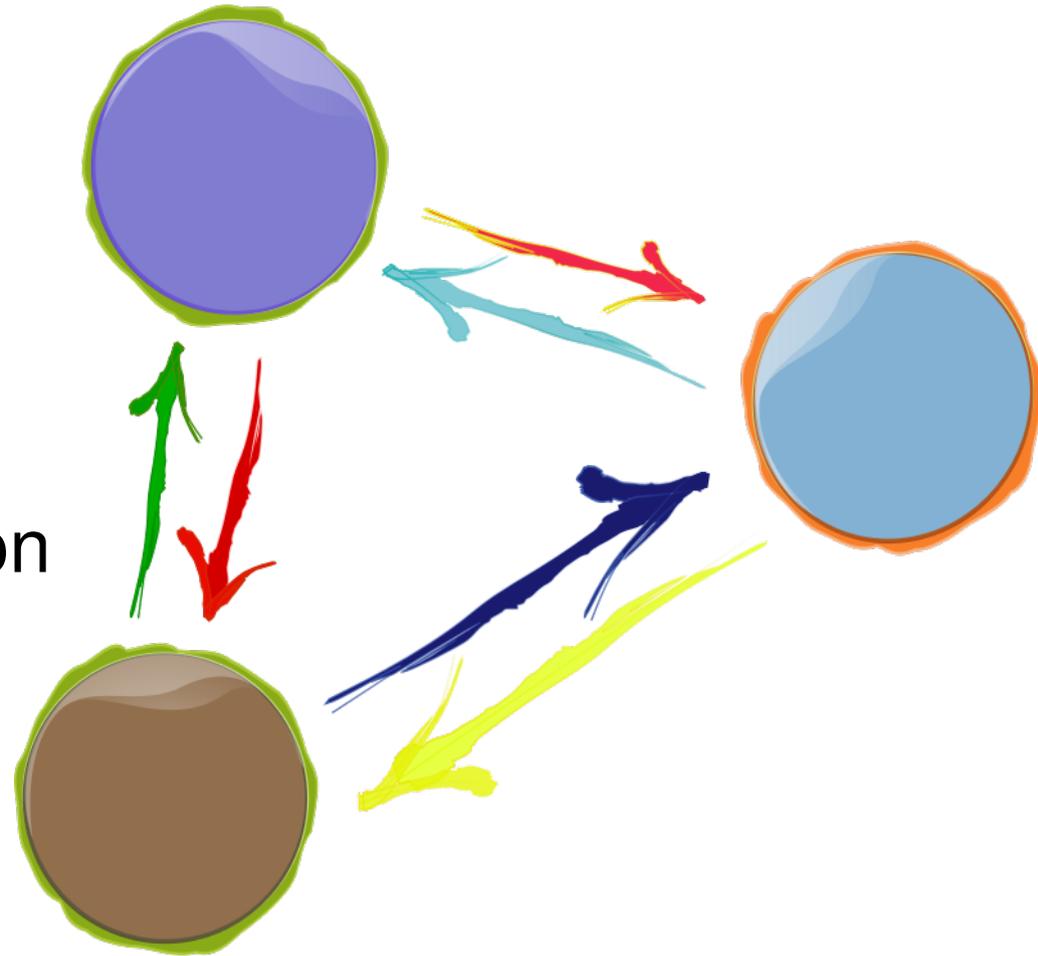

*extend type system*

*optimizations*

*elektrify*

# Conclusion

- **out-of-the-box experience**
  - better defaults
  - dependences in plugins
- **share configuration**
  - using other's configuration
  - across applications
- **support tooling**
  - introspection
  - make system administration sane
