

# Spawny

A new approach on logins

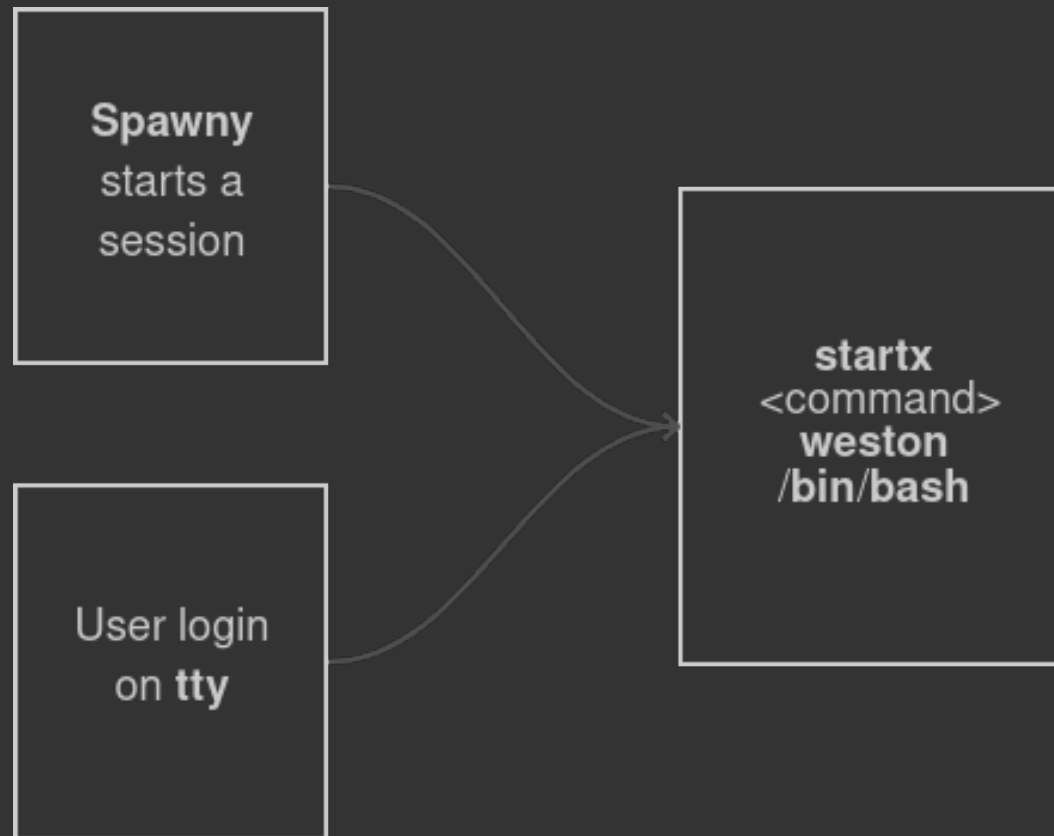

# What is it ?

Service for offering **login** capabilities

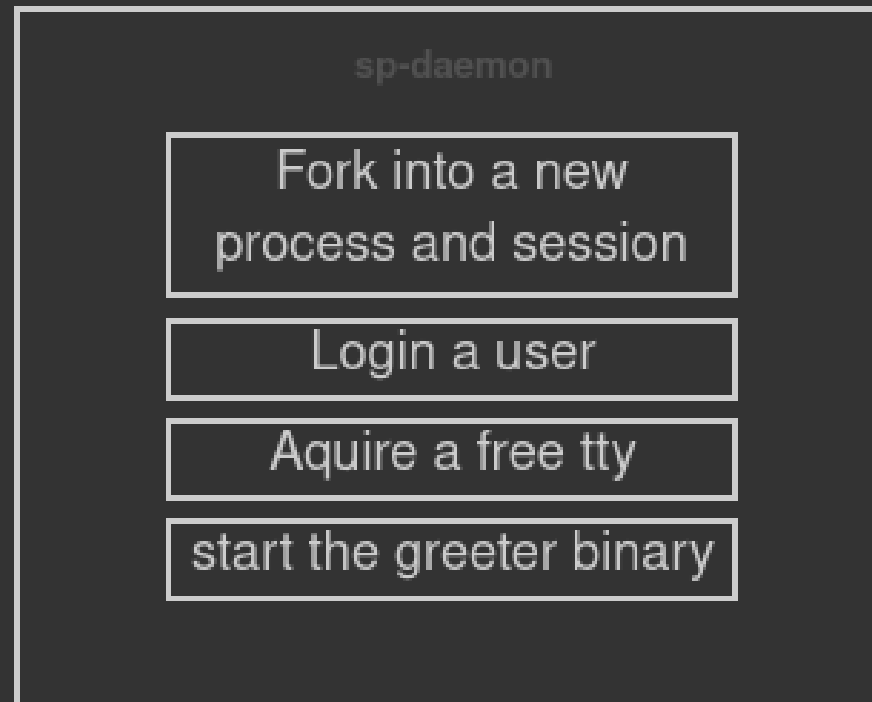

# The basic approach

Unify the workflow from a **developer** and  
**user**

# The basic approach

# How does it work ?

# Greeters

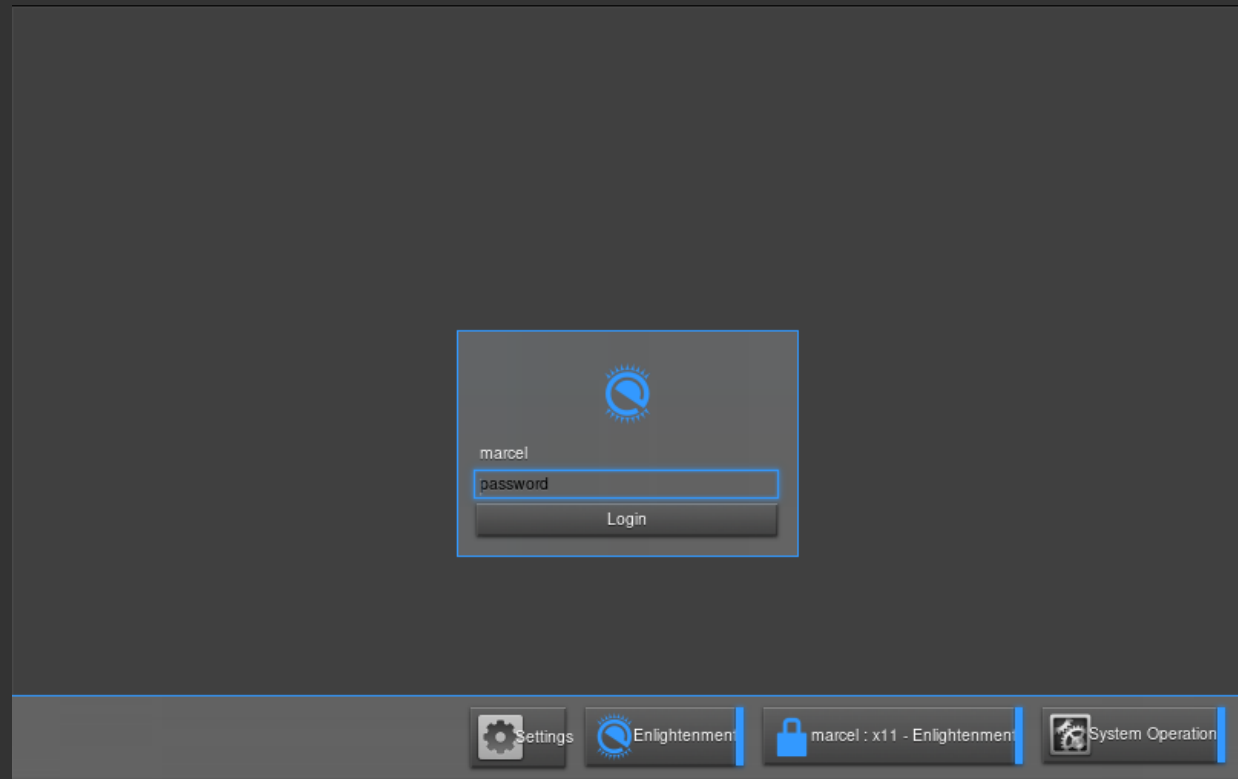

**Text-mode** Greeter is shipped with the service

No dependency on  
any **Toolkit**

Can be used as  
**fallback** for failure &  
misconfiguration

# Graphical greeters?

anna

<https://github.com/marcelhollerbach/anna>

# spawnny as a subproject

spawnny is using  
meson

use spawnny as  
**subproject** in your  
project

That will install all  
**spawnny** part along  
with your greeter

You can use **sp-  
greeter-set** to set  
your greeter as  
default

# Future Goals

Monitor **greeter** hangups

Support finger  
readers

Secure Lockscreen

# Take away

*Graphical* frontend for using a **getty**

Focus is on keeping  
**responsive** system

Undependend from  
**Xserver**
