<https://github.com/fossasia?utf8=✓&q=open-event>

- Developed Since February 2015
- Why? No good system for ticketing + speaker handling
- Unhappy with proprietary systems
- Largest event today 3500 pax

The screenshot displays the eventyay website interface. At the top, there is a search bar with the text "Search for..." and a magnifying glass icon. To the right of the search bar are navigation links: "BROWSE EVENTS", an envelope icon, a user profile icon labeled "MARIO", and a "CREATE EVENT" link. Below the navigation is a large hero image showing a person writing in a notebook, with the text "The simplest way to create events." overlaid and a "CREATE EVENT" button. Below the hero image is a search filter section with a search bar containing "Search for events", a location dropdown set to "United States", a date dropdown set to "All Dates", and a "SEARCH" button. Below the search filter is a section titled "Upcoming Events" with three event cards. Each card features a photo of the event, the event name, the date and time, and the location.

Open Event System: Goals

The FOSSASIA Summit 2019 is an exciting Open Technology event for developers, students, and start ups using open source to build up their businesses. It is a unique opportunity to share the latest innovations in open source technologies and meet contributors and potential partners. It will take place once again in Singapore from March 14 - 17, 2019.

Since the first FOSSASIA meetup in 2009 in Ho Chi Minh City, FOSSASIA has taken the lead to organize Free and Open Source Software conferences in Asia. Past FOSSASIA events have attracted thousands of participants, speakers from 41 countries, and hundreds of volunteers. The FOSSASIA Summit has an over the average participation of female technologists.
