Famous Quote that I love:

The W. EDWARDS
Deming
Institute

Cease dependence on inspection to achieve quality. Eliminate the need for inspection on a mass basis by building quality into the product in the first place.

W. Edwards Deming

Some constraints for these tools

The tool MUST be OpenSource

- The tool is released and free to use *within given lic. model*
- Source code available for review and modification

Cross platform: run on Mac, Windows and Linux

→ Will demo on recent Fedora Linux

Must be installable by me ***at least***

- If I can't even.... others will prob. struggle as well
- Will follow provided documentation to my best
- Installed locally (not one click cloud)

Test Automation setup phazes (hi-level)

REQUIREMENTS / EXPECTATIONS

- Goals with TA
- TA strategy / release process fit
- Match SUT architecture & team way of working

GETTING STARTED

- Defining the complete toolset to reach set goals
- Embedding TA tool in test/release process (incl. pipeline)
- Installing the tool / run an example testcase / make your own test case

USING THE TA SOLUTION

- Speed of execution
- Maintenance
- Support
- Logging, reporting, dashboarding

Test Automation setup phazes (hi-level)

REQUIREMENTS / EXPECTATIONS

- Goals with TA
- TA strategy / release process fit
- Match SUT architecture & team way of working

GETTING STARTED

- Defining the complete toolset to reach set goals
- Embedding TA tool in test/release process (incl. pipeline)
- Installing the tool / run an example testcase / make your own test case

USING THE TA SOLUTION

- Speed of execution
- Maintenance
- Support
- Logging, reporting, dashboarding

Focus area for this presentation

Disclaimer

- There is not such thing as a silver bullet for TA!
- Opinions are my own
- Scoring is done for the storyline and by no means complete
- Huge shoutout to all the OSS developers of these projects

“Score” Card

Ease of installation

Run examples provided

Speed of execution

Authoring of test cases

Logging / debugging

Dashboading and reporting

Pipeline integration

Community support

Short summary of OSS project

Since when is it available

Website

Repo

Note: this scoring is done totally subjectively by me, mainly to give a storyline to this talk. Take it with a grain of salt in that regard.
Do what's best for your own needs and choose the right tool, remember, there is no silver bullet for test automation.

SeleniumBase

Ease of installation

Run examples provided

Speed of execution

Authoring of test cases

Logging / debugging

Dashboading and reporting

Pipeline integration

Community support

Short summary of OSS project

- Official release 2016
- <https://seleniumbase.io>
- <https://github.com/seleniumbase/SeleniumBase>

Cerberus

Ease of installation

Run examples provided

Speed of execution

Authoring of test cases

Logging / debugging

Dashboading and reporting

Pipeline integration

Community support

Short summary of OSS project

- 1st commit on Github 2013
- <https://cerberus-testing.com>
- <https://github.com/cerberustesting>

Cypress

Ease of installation

Run examples provided

Speed of execution

Authoring of test cases

Logging / debugging

Dashboading and reporting

Pipeline integration

Community support

Short summary of OSS project

- 1st Github commit 2014
- <https://www.cypress.io/>
- <https://github.com/cypress-io/cypress>

RobotFramework

Ease of installation

Run examples provided

Speed of execution

Authoring of test cases

Logging / debugging

Dashboading and reporting

Pipeline integration

Community support

Short summary of OSS project

- 1st version 2005
- <https://robotframework.org>
- <https://github.com/robotframework>

Cucumber-JVM

Ease of installation

Run examples provided

Speed of execution

Authoring of test cases

Logging / debugging

Dashboading and reporting

Pipeline integration

Community support

Short summary of OSS project

- 1st version 2012
- <https://cucumber.io/>
- <https://github.com/cucumber/cucumber-jvm>

To be concluded

Thank you!
