

# CNI 2.0: Vive la révolution

FOSDEM 2023

Douglas Smith

Principal Software Engineer, OpenShift Engineering @ Red Hat, Inc.

Hi, I'm Doug!

## Doug Smith

- Technical lead for OpenShift Network Plumbing Team in OpenShift Engineering
- Multus CNI maintainer
- Network Plumbing Working Group member
- Blog: <https://dougbtv.com>

CNI.

CNI

COE?

COE

# Container Orchestration Engine

Can you name one?

Can you name TWO!?

CNI is COE agnostic.

This has been great,  
we love CNI because  
it's modular... but...

If we don't improve  
CNI, people will ignore  
it.

It's bad news.

It's already happening.  
It's bad for OSS + K8s.

It's because they want  
tighter integration with  
K8s.

People are using  
Multus CNI as a K8s  
compatible CNI  
runtime

Let's make CNI and  
K8s happy together in  
CNI 2.0

Vive la révolution!

Vive la CNI 2.0  
révolution!

# Get involved!
