# Energy Consumption – Use & Production

[https://theshiftproject.org/wp-content/uploads/2019/03/Lean-ICT-Report\\_The-Shift-Project\\_2019.pdf](https://theshiftproject.org/wp-content/uploads/2019/03/Lean-ICT-Report_The-Shift-Project_2019.pdf)

- **Efficiency**
- **Conservation**

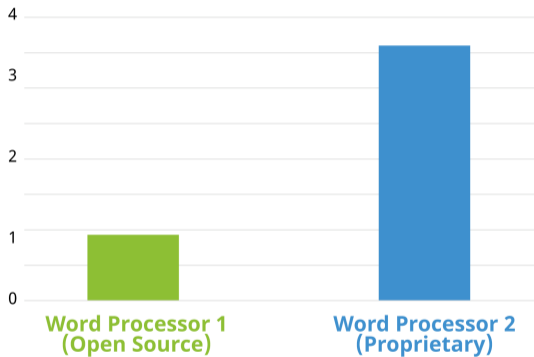

*same task, fewer hardware demands  
reducing waste driven by software*

- **Efficiency**
- Conservation

*same task, fewer hardware demands*  
*reducing waste driven by software*

# Efficiency – Usage Scenario Measurements

Watt-hours

Adapted from: <https://www.umweltbundesamt.de/publikationen/entwicklung-anwendung-von-bewertungsgrundlagen-fuer>

# Efficiency – Scale Up

Adapted from Detlef Thoms HPI course: <https://open.hpi.de/courses/cleanit2021/items/5DHsS3tJsXAqfUE4q4F82Z>

# Efficiency – Act Local, Act Global

Adapted from Detlef Thoms HPI course: <https://open.hpi.de/courses/cleanit2021/items/5DHsS3tJsXAqfUE4q4F82Z>

# Efficiency – Eliminating Unnecessary Processes

Modified from: <https://www.umweltbundesamt.de/publikationen/entwicklung-anwendung-von-bewertungsgrundlagen-fuer>

- **Efficiency**
- **Conservation**

*same task, fewer hardware demands*  
*reducing waste driven by software*

# Conservation – “Tsunami Of E-Waste”

E-waste 2016 = 4500 Eiffel Towers = Height of 17 Mount Everests

<20 %  
Recycled

2 % e-waste  
≈ 70 %

landfill

Based on report: <https://www.itu.int/en/ITU-D/Climate-Change/Documents/GEM%202017/Global-E-waste%20Monitor%202017%20.pdf>

# Conservation – Software-Driven Hardware Obsolescence

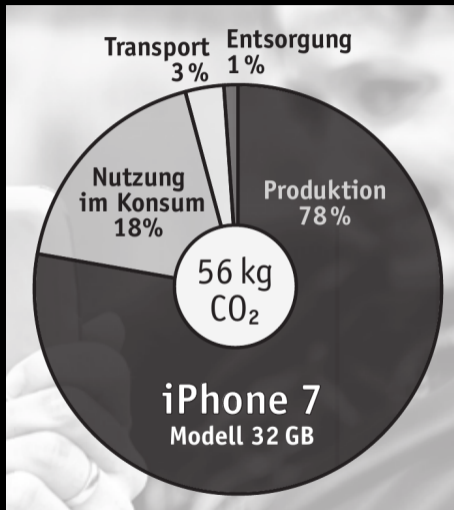

## Software

- **Abandonware / Planned Obsolescence:** "Device is no longer supported . . ."
- **Bloat / Feature Creep:** "Device doesn't meet minimum system requirements . . ."

## Result

- New devices produced and shipped unnecessarily
- Functioning devices discarded as e-waste

# Conservation – Production Has A Big Environmental Impact

Based on data from "Smarte Grüne Welt": <https://www.oekom.de/buch/smarte-gruene-welt-9783962380205>

# KDE's Vision – A People-Oriented Digital Society

**"A world in which everyone has control over their digital life  
and enjoys freedom and privacy."**

<https://community.kde.org/KDE/Vision>

"A **world** in which **everyone** has **control** over their digital life ..."

"We don't want to hand over control to anybody else. [...] KDE wants to put you in the driver's seat."

→ **How? By developing Free & Open Source Software!**

"... and enjoys **freedom** and **privacy**."

"... without the freedom to make changes and share them, [users] are entirely reliant on the vendor's benevolence for apparent 'control'"

→ **Transparency and user autonomy aren't features – they are inherent to FOSS!**

# Blauer Engel For Desktop Software (2020)

## FOSS Advantage

**Transparency** and **user autonomy** recognized as being crucial to **sustainable software** design!

### ABC of Certification Criteria

## 3 Steps of Eco Certification

### MEASURE

Run usage scenarios to measure energy and hardware consumption in three modes

### ANALYZE

Data analysis using OSCAR (Open Source Software Consumption Analysis in R)

### CERTIFY

Submit a report on the fulfillment of the Blauer Engel criteria

## (A) Resource & Energy Efficiency

- Hardware performance/energy consumption (idle & standard usage)
- Minimum system requirements (CPU, working memory)
- Support for energy saving modes

## (B) Potential Hardware Operating Life

- Runs on hardware at least 5 years old

## (C) User Autonomy

- Uninstallability / Modularity (installing essential functions only)
- Continuity of support (security updates)
- Offline capability / Freedom from advertising
- Documentation (open standards, uninstallation how-to, privacy policy)
- Transparency (open source/APIs open standards)

## (A) Resource & Energy Efficiency

- Hardware performance/energy consumption (idle & standard usage)
- Minimum system requirements (CPU, working memory)
- Support for energy saving modes

## (B) Potential Hardware Operating Life

- Runs on hardware at least 5 years old

## (C) User Autonomy

- → Uninstallability / Modularity (installing essential functions only)
- → Continuity of support (security updates)
- → Offline capability / Freedom from advertising
- Documentation (open standards, uninstallation how-to, privacy policy)
- Transparency (open source/APIs open standards)

## Uninstallability / Modularity

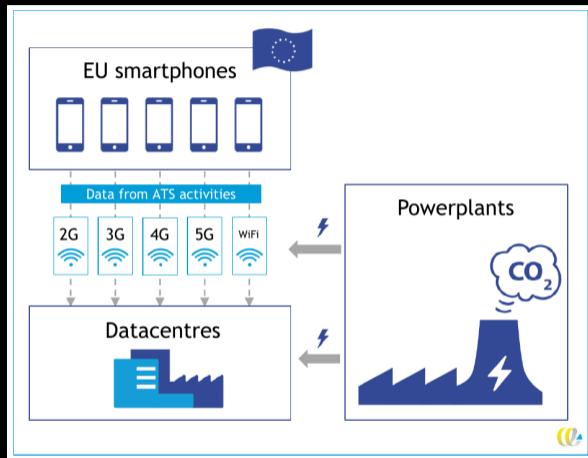

```
prox14amd:~$ sudo apt purge ...
```

# Continuity Of Support

# We Can Demand More – Right To Repair Must Include Software

Open Letter To Legislators In EU, 27 April

(Upcycling Android, FSFE)

That is why we ask legislators in the European Union to make use of the historic chance and enable a more sustainable use of electronic products and devices with a universal right to install and run any software on any device. To this end, we demand that:

**Users have the right to freely choose operating systems and software running on their devices**

Our tablets, phones and other connected devices are general purpose computers. Replacing software and operating systems on these devices enables us to extend the initial lifespan of a device and to make full use of our hardware. For the ability to reuse and repurpose our resources in a creative and sustainable way we need **the universal right to install and develop any operating system and software we want on any of our devices.** Any legal, technical or other obstacles to reuse these devices for any purpose must not be allowed.

<https://fsfe.org/activities/upcyclingandroid/openletter.html>

# And Do More – By Keeping Hardware In Use With Free Software

Tired of replacing your smartphone every other year?  
Renew and keep using your phone with Free Software!

## How to upcycle your phone and extend its usage lifetime

Select a Custom ROM:  
some focus on full user  
freedom, others on privacy,  
on usability, and more!  
Free choice.

Take ownership  
and flash your phone.

Get F-Droid  
and enjoy the largest  
Free Software app store  
in the Android world!  
Browsers, maps, games,  
music, chats and more!  
Everything in one place.  
<https://f-droid.org/>

**UPCYCLING**  
**Android**

This project is financially supported by

... since you are here – want  
to get rid of Google Play  
Services as well? Install  
MicroG and get the best of  
your hardware without!

Congratulations!  
Your phone is updated,  
upgraded and upcycled!  
Enjoy the look and feel  
of a brandnew device.
