Empowering educators to improve our world

Noel De Martin
February 3rd 2024 @ FOSDEM

Moodle LMS

Moodle LMS is an open source and secure learning management system that can be customised for any course or teaching method you choose.

Our mission and manifesto

Moodle is a platform that is dedicated to empowering educators, trainers and learners all around the world. Our goal is to create solutions that make learning accessible to everyone, regardless of their location or financial situation. We want to enable learners to receive personalised learning experiences with creative educational content, easily collaborate with teachers and peers globally, and achieve outstanding learning outcomes.

Empowering educators to improve our world

Our aim is to cultivate a love for learning, fostering a community of lifelong learners, who are equipped to succeed in our ever-changing world and active participants in making the world a better place. At Moodle, we envision a future where learning is truly a right, not a privilege, and where everyone has the opportunity to unlock their full potential.

Let's celebrate! 20 year anniversary of Moodle's first source code commit

NOVEMBER 17, 2021 BY ABBY FRY

On November 22, 2021 it will be exactly 20 years since our CEO and Founder, Martin Dougiamas, submitted Moodle's first source code commit. This first code commit started a process of community collaboration that has involved 871 developers from 57 countries and over 128,746 code commits. In fact, these 871 developers are more likely many thousands of developers because code is often written by a team of developers, but submitted by a single person.

This represents our open source project, Moodle LMS, in action!
