

Building the world's online classroom

FOSDEM '24 Lightning Talk
Sunday, February 4, 2024
12:00 – 12:15 CET (UTC+1)
Brussels, Belgium

Frederick Dixon
ffdixon@bigbluebutton.org

Steven Muegge
smuegge@bigbluebutton.org

BigBlueButton

is a platform for purpose-built virtual classrooms

It empowers teachers to teach
and learners to learn

Video ... and much more

<https://bigbluebutton.org>

The goal of the virtual classroom is not to meet, it is to learn

Virtual
Classroom
Platform

Goal: **To Learn**

Video
Conferencing
System

Goal: **To Meet**

United Nations SDG 4: Quality Education

“Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all”

According to UNESCO (September 2023):

- 16% of children and youth are not attending school
- At primary level, 1 out of 10 children are not in school

BigBlueButton is open source

- Localized into 55+ languages
- Contributions from 150+ developers worldwide
- Open source is a way to reach everyone everywhere, while respecting privacy and data protection requirements

BigBlueButton is open source

and integrates
with other
software
systems

- Localized into 55+ languages
- Contributions from 150+ developers worldwide
- Open source is a way to reach everyone everywhere, while respecting privacy and data protection requirements

- Deep integrations with Learning Management Systems (LMS)

Framework → **BigBlueButton** → **Future**

**You want this response from
students and teachers:**

**“That was the best virtual
class ever!”**

65 years of Pedagogy

Framework

BigBlueButton

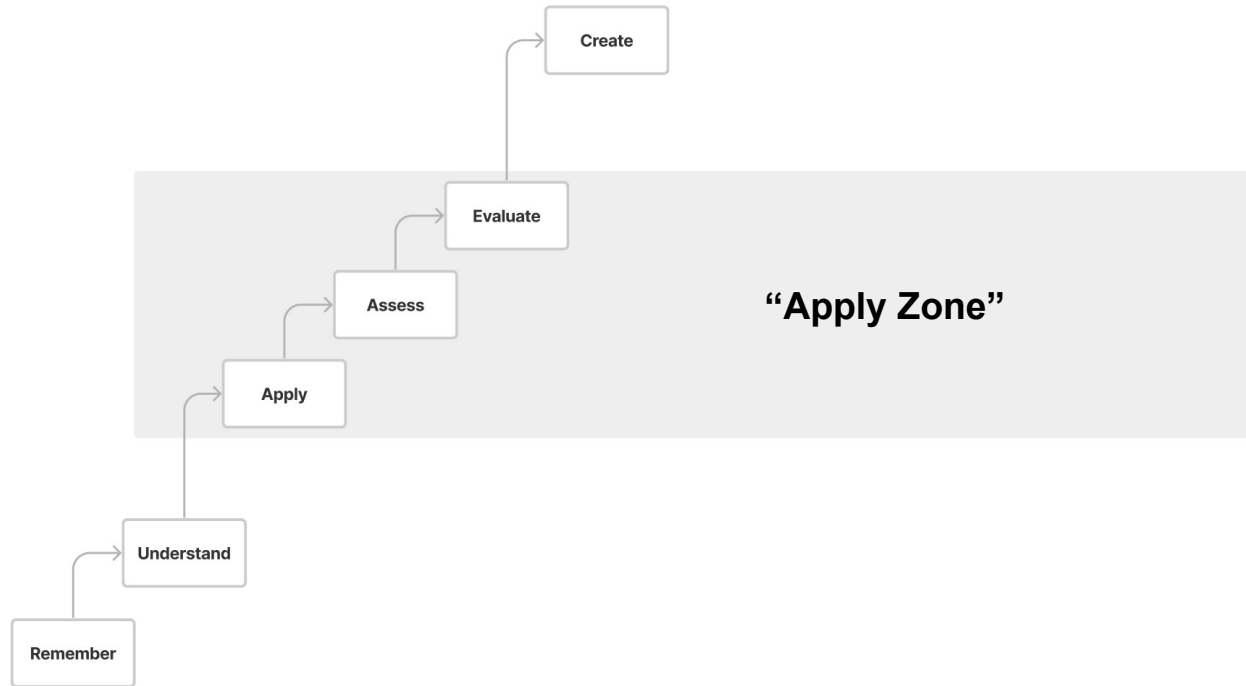

Future

**Examples of three
ideas from pedagogy**

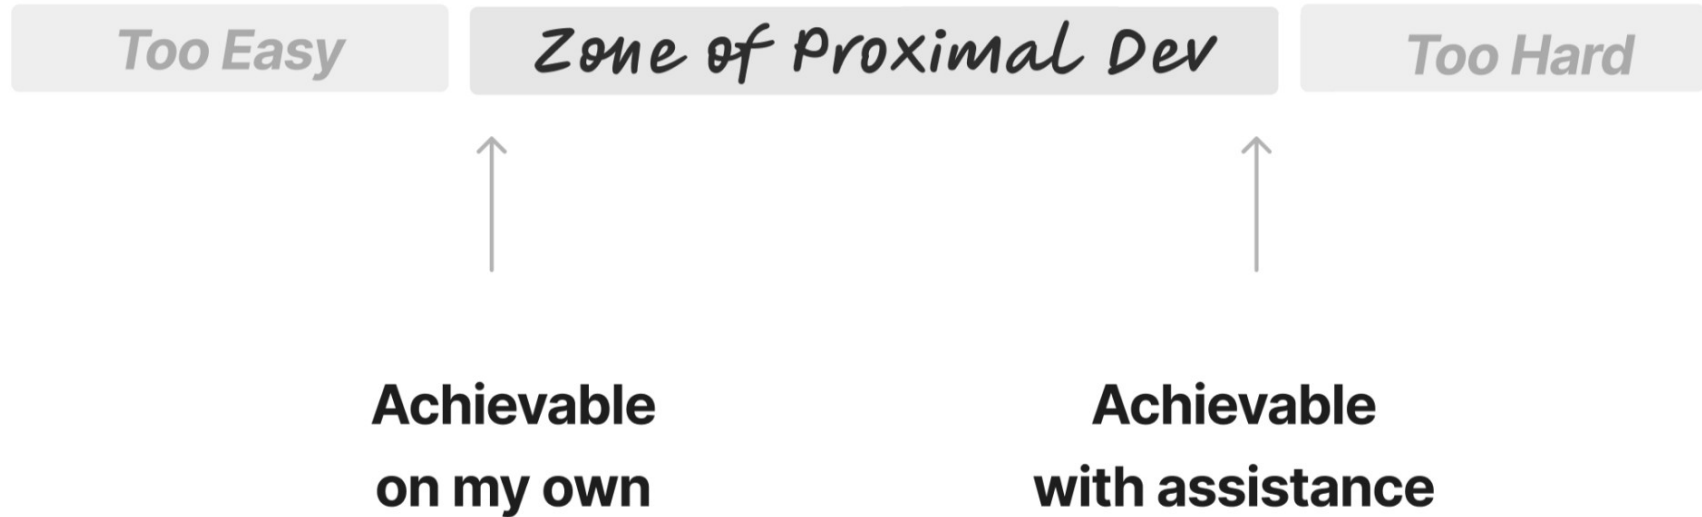

1: Lower-order and higher-order thinking

Version of Benjamin Bloom's *Taxonomy of Learning*

2: Proximal development; collaboration

Version of Lev Vygotsky's *Zone of Proximal Development*

3: Social Constructivism

1. **All of us are potential teachers** as well as learners - in a true collaborative environment we are both.
2. We learn particularly well from the **act of creating or expressing something for others to see.**
3. **We learn a lot by just observing the activity of our peers**
4. **By understanding the contexts of others,** we can teach in a more transformational way (constructivism)
5. A learning environment needs to be flexible and adaptable, **so that it can quickly respond to the needs of the participants within it.**

Martin's five laws: Research-based referents that shaped Martin Dougiamas' design of the Moodle open-source learning management system (LMS)

Source: <https://docs.moodle.org/311/en/Pedagogy>

Framework

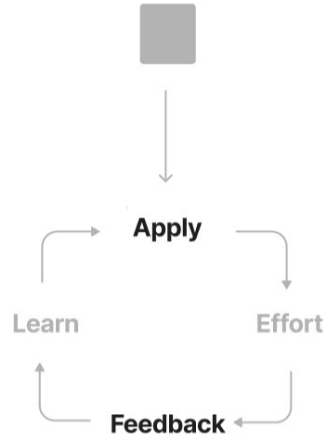

BigBlueButton

Future

Support virtuous cycles of **applied learning**, building lower-order and higher-order thinking, with collaboration and feedback

Tip: One question mark indicates a poll.

What are the rings of Saturn made of?

- A. Iron
- B. Ice
- C. Granite
- D. Volcanic rocks
- E. Gummy bears

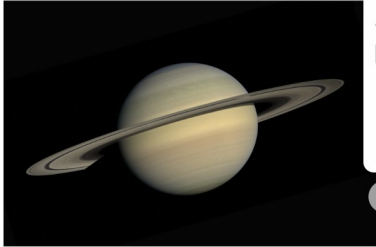

Photo by NASA

A/B/C/D/E

< Slide 8 > [Envelope] [Minus] 100% [Plus] [Double Arrow]

The screenshot shows a presentation slide with a poll question: "What are the rings of Saturn made of?". The word "of?" is highlighted with an orange box. Below the question are five multiple-choice options: A. Iron, B. Ice, C. Granite, D. Volcanic rocks, and E. Gummy bears. To the right of the text is a photograph of Saturn with its rings, credited to NASA. At the bottom of the slide, there is a blue button with the text "A/B/C/D/E". The presentation interface includes a top bar with "Styles" and navigation arrows, a right-side toolbar with various editing tools, and a bottom navigation bar showing "Slide 8" and zoom controls.

Framework → BigBlueButton → **Future**

Strategy for the future

Make ourselves
awesome for
teaching and
learning

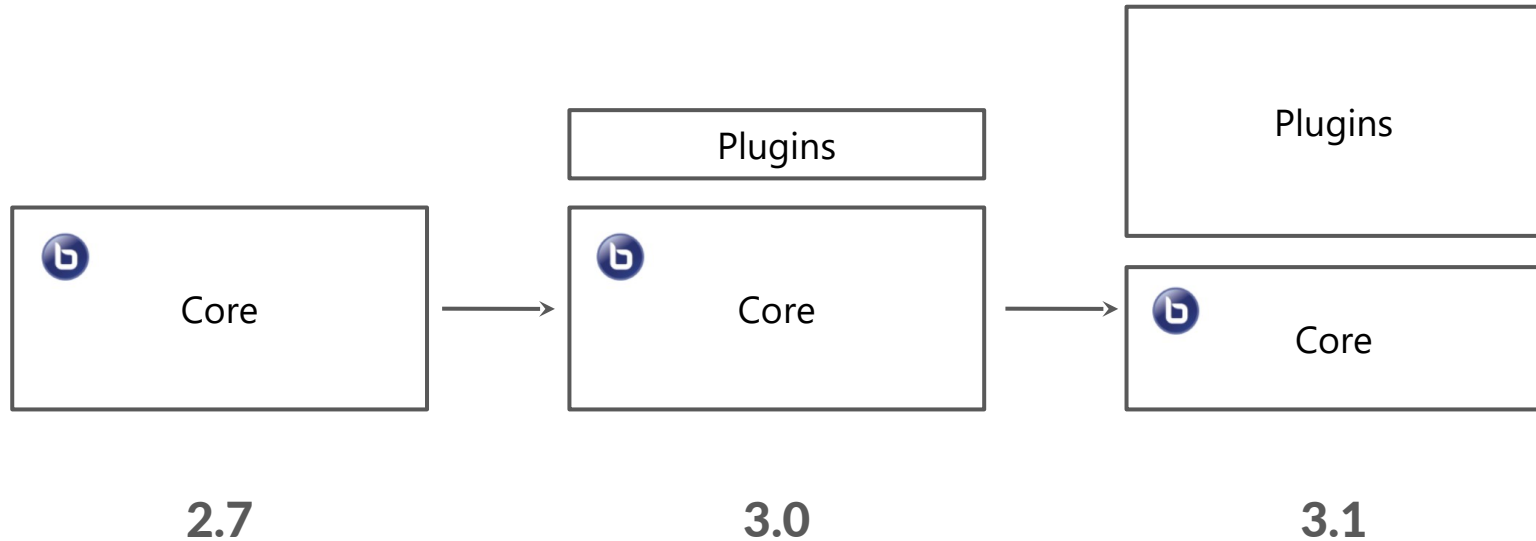

Make ourselves
equal (or better!)

Continued focus on applied pedagogy

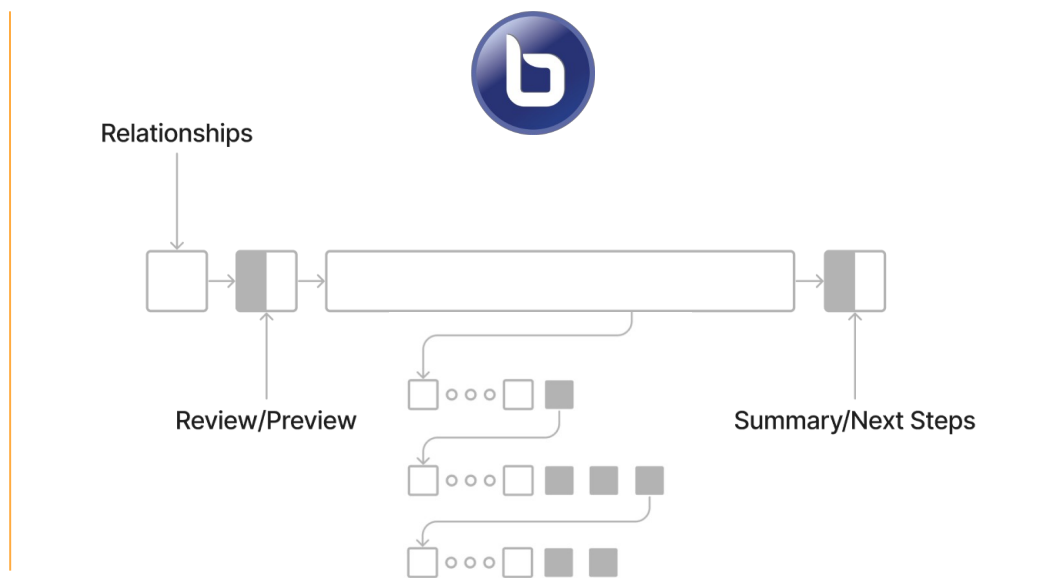

- Maximize time for **applied learning** and feedback
- In applied learning, the teacher is a **coach** and **mentor**
- Build **critical thinking skills** (not just about passing exams)
- Emphasis on **teamwork** to solve harder problems
- Generate and act on analytics
- Support many virtual classroom use cases with **plugins**:
fully-virtual classes, hybrid classes, meetups, workshops ...

Plugin architecture: BigBlueButton as a platform

Enable AI everywhere: before, during, and after class
